

# *Support for VISCA-compatible Cameras*

The Polycom® iPower™ 9000 system provides support for the VISCA™ command protocol. This capability allows users to control VISCA-compatible cameras from the iPower system interface.

## **Supported Cameras**

The following VISCA-compatible cameras have been tested and support the controls listed in the section “Supported Functionality.”

- Sony EVI-D30
- Sony EVI-D31
- Sony EVI-D100
- Sony EVI-D101

To connect the camera to the iPower system, use the control cable adapter (part number 1457-50527-001). To order this cable, contact Polycom and request order number 2200-51000-001.

## **Supported Functionality**

VISCA-compatible cameras support the following iPower camera controls:

- Pan
- Tilt
- Zoom
- Brightness
- Presets

## **Restrictions**

Note the following restrictions when using VISCA-compatible camera with the iPower 9000 system:

- ❑ Hardware Diagnostics does not detect the Sony D30 and D100 cameras. You cannot test these cameras using Hardware Diagnostics.
- ❑ Daisy-chaining of cameras is not supported.
- ❑ If you configure a Pan, Tilt, or Zoom preset for a Sony D30 camera for the minimum or maximum positional setting, the preset may not work reliably.
