

QX™ Technical Bulletin: QX 300 and QX 400 and SoundStation VTX 1000®

QX Core Configurations

The QX 400 is designed to work in most environments. It ships with the QX Content Controller, a VGA cable with a simple extension to provide a Content and Info button interface to the tabletop. The VGA cable is used for the presenter to connect his or her computer to the QX, just as someone would connect when displaying information on a projector.

QX 400	2200-45000-001
QX 400 2 pack	2200-45402-001
Bundle: QX 400 with SoundStation2, expandable	2200-45460-001

The QX 300 is designed to work out of box with the SoundStation VTX 1000. The core QX hub is identical to the QX 400. However, with the SoundStation VTX 1000, the QX content Sharing and Info button functions appear as softkeys on the conference phone LCD user interface*. Accordingly, with the QX 300 the Content Controller extension is not required. The product ships with a standard VGA cable to connect a presenting computer to the QX hub. An additional high-speed digital data cable (Polycom Conference Link cable) is required to connect the SoundStation VTX 1000 to the QX. The Conference Link cable runs in parallel to the 8-wire cable and can be bundled together to minimize additional clutter. The cable is included with the QX 300 SKUs but is not included with the QX 400. Please see next section for more information.

QX 300	2200-45001-001
QX 300 2 pack	2200-45302-001
Bundle: QX 300 with SoundStation VTX 1000	2200-45340-001

Additional Configurations:

QX 400 – Customers can start with a QX 400 and easily migrate it to work with a SoundStation VTX 1000 if they upgrade their conference phone in the future. To enable a QX 400 to work with the SoundStation VTX 1000, customers purchase an accessory Conference Link cable kit – Polycom part number 2215-21903-001, as well as update the SoundStation VTX 1000 software to release 1.6 or later.

QX 300 – Customers with the SoundStation VTX 1000 can choose to add a secondary content sharing user interface on the table by purchasing the QX Content Controller accessory – Polycom part number 2215-45100-001. The list price of purchasing a QX 300 + a QX Content Controller is the same as the price of the QX 400. The SoundStation VTX 1000 must be at software to release 1.6 or later.

*Requires upgrade to SW Rel 1.6 or later prior to connecting SoundStation VTX 1000 to the QX hub.
