## What's New

This release of the Polycom Studio USB video bar includes all the features of the previous releases and the following new feature.

### ***Microsoft Certification***

Polycom Studio is now certified by Microsoft for Skype for Business, Microsoft Teams, and Microsoft Teams Room.

# Release History

The following table lists the release history of Polycom Studio.

## Release History

<i>Release</i>	<i>Release Date</i>	<i>Features</i>
1.1.2	October 2019	Certified by Skype for Business. Bug fixes.
1.1.1	August 2019	Bug fixes.
1.1.0	July 2019	Bug fixes. Support for Polycom Trio Visual+ and Zoom Rooms. Support for 802.1x EAP-TLS authentication. Support for backlight compensation and the corresponding configurations from Polycom Companion. Support for Acoustic Fence configurations and certificate management from Polycom Companion.
1.0.1	May 2019	Bug fixes. Enables more provisioning options.
1.0.0	February 2019	Initial release with setup and configuration support using Polycom Companion.

## Security Updates

Please refer to the [Polycom Security Center](#) for information about known and resolved security vulnerabilities.

## Supported Video Communication Clients

Polycom Studio works with the following communication clients:

- Polycom RealPresence Desktop
- Microsoft Skype for Business
- Microsoft Teams
- BroadSoft UC-One
- Zoom
- BlueJeans Network
- LogMeIn GoToMeeting
- Google Hangouts communication platform
- Amazon Chime

- Cisco Webex
- Vidyo Desktop

Your system's actual performance may vary based on software or hardware configurations.

## Supported Operating Systems

You can connect the Polycom Studio USB video bar to computers or devices that run the following operating systems:

### Supported Operating Systems

Platform	Operating System
<b>Windows</b>	Windows 7 with latest service pack
	Windows 8.1
	Windows 10
<b>MacOS</b>	10.12 Sierra
	10.13 High Sierra
	10.14 Mojave

## Supported External Microphone

Polycom Studio supports the Polycom RealPresence Debut Expansion Microphone.

See the *Polycom Studio Expansion Microphone Setup Sheet* for information on how to connect your Polycom Studio USB video bar with the expansion microphone.

## Products Tested with This Release

Polycom Studio is tested extensively with a wide range of products. The following list isn't a complete inventory of compatible equipment. It indicates the products that have been tested for compatibility with this release.

Polycom recommends that you upgrade your Polycom devices with the latest software versions, as compatibility issues may already have been addressed by software updates. See the [Current Polycom Interoperability Matrix](#) to match product and software versions.

### Products Tested with This Release

Product	Tested Versions
Polycom RealPresence Desktop	3.9.1, 3.10
Microsoft Skype for Business	Win: Sfb2016-16.0.*
	Mac: Sfb16.2.156

<i>Product</i>	<i>Tested Versions</i>
BroadSoft UC-One Communicator	Win: 22.6.3.2
Microsoft Teams	1.2
Zoom	4.4
Zoom Rooms	4.4
BlueJeans Network	Win: 2.13.533.0 Mac: 2.13.1.17
LogMeIn GoToMeeting	Win: 13.4.2 Mac: 8.39.0(11408)
Google Hangouts communication platform	Current version
Amazon Chime	Win: 4.16.8849.1 Mac: 4.16.6291
Cisco Webex	Win: 3.0.10626.0 Mac: 3.0.10260.0
VidyoDesktop	Win: 3.6.3(014)
Polycom RealPresence Resource Manager	10.6
Polycom Device Management Service for Enterprise	Current version
Polycom Companion	1.2.1
Polycom MSR Dock	4.0.64.0
Polycom Trio Visual+	5.9.0

## Tested USB Extenders

Polycom Studio follows the USB-IF standard and is compatible with both USB 2.0 and USB 3.0.

The following list isn't a complete inventory of compatible USB extenders. It indicates those that have been tested for compatibility with this release:

- UNITEK Y-3005
- Icron USB 2.0 Ranger 2304
- Icron USB 2.0 Ranger 2311

When you connect the Polycom Studio USB video bar to a USB hub, the performance may vary depending on the hub.

## System Constraints and Limitations

---

This section provides information on constraints and limitations when using Polycom Studio 1.1.2.

## ***Bluetooth***

Polycom Studio only supports one Bluetooth connection at a time.

## ***Aligned Audio and Video Source of Applications***

Polycom Studio doesn't support mixed types of audio and video input like a PC microphone with Polycom Studio video. If you connect the Polycom Studio USB video bar to a computer over USB and Bluetooth at the same time, make sure that your application uses both audio and video input from Polycom Studio over USB.

## ***HID Control***

Polycom Studio only gets full control of software clients that support a standard human interface device (HID) protocol, such as Microsoft Skype for Business. For other clients, your remote control only changes the behaviors of your Polycom Studio USB video bar without syncing the status to the software.

The following are examples of this behavior:

- When you set the Polycom Studio USB video bar as the audio and video device for Polycom RealPresence Desktop, you can't answer or hang up a call using the remote control.
- When you press **Mute** or **Unmute** on the remote control, only the Polycom Studio USB video bar mutes or unmutes, and the red LED bar changes color accordingly. Although the far-end can't hear any audio, you must click the **Mute** or **Unmute** button on the software client to indicate to the other call participants that you muted or unmuted your audio.

## ***Security***

If you use a certificate chain for authentication, the EAP-TLS connection with wireless networks fails.

## ***Anti-Flicker Feature***

You must manually set the camera anti-flicker settings in Polycom Companion to correct the value based on different country locations. To update these settings, open Polycom Companion and go to **Settings > Camera Control > Camera Advanced Settings > PowerLine Frequency (Anti Flicker)**.

## 4K Video

Polycom Studio supports 4K video, but the functionality depends on the software client and monitor you use. For example, if you use a USB 3.0 cable and the Windows 10 Camera app, you can get a 4K preview.

## UVC Driver for H.264 Streaming

When you use a USB 2.0 cable, the 2K or 4K video resolution requires H.264 support. You can download and install the UVC 1.5 driver from [Polycom Support](#) to enable H.264 streaming.

## Video Color Limitation

Color reproduction accuracy can vary based upon environmental conditions and camera sensor capabilities.

## Resolved Issues

The following table lists resolved issues in Polycom Studio 1.1.2.

### Resolved Issues

<i>Category</i>	<i>Issue ID</i>	<i>Description</i>
Audio	EN-147108	Volume increases too slowly.
Audio	EN-149670	When the near and far ends talk at the same time in a call, the volume of the far end drops as designed, but it takes too long to restore.

## Known Issues

The following table lists known issues in Polycom Studio 1.1.2.

These release notes do not provide a complete listing of all known issues that are included in the software. Issues not expected to significantly impact customers with standard voice and video conferencing environments may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.

### Known Issues

<i>Category</i>	<i>Issue ID</i>	<i>Description</i>	<i>Workaround</i>
Audio	EN-114506	Sometimes the far end may hear noises when no one is talking due to a Polycom NoiseBlock issue.	Mute your device when you aren't speaking.

<i>Category</i>	<i>Issue ID</i>	<i>Description</i>	<i>Workaround</i>
Audio	EN-117574	When <b>Stereo</b> mode is off and the far end shares stereo music in a call, you may hear the music cut out or the volume may change.	Enable <b>Stereo</b> mode in Polycom Companion.
Audio	EN-120977	When you connect an external micpod, the audio input might switch between the external micpod and the internal microphone. The far end hears audio with inconsistent quality.	None.
Bluetooth	EN-115776	When you stream music via Bluetooth, it takes a long time to wake the remote control.	Pause the music before waking up the remote control.
Bluetooth	EN-134664	The Bluetooth connection between Polycom Studio and a Mac may automatically disconnect when you use a 2.4 GHz Wi-Fi network.	Connect to a 5 GHz Wi-Fi network.
Bluetooth	EN-140897	If your Polycom Studio fails to connect to a new Wi-Fi network because of incorrect settings or connects to a new Wi-Fi network and then forgets it, Polycom Studio may fail to auto-connect to an available Wi-Fi network you previously saved.	Manually connect again.
Remote Control	EN-116470	It takes one to three seconds to wake up the remote control.	None.
Tracking	EN-129257	Speaker tracking is insensitive in an ultrasonic environment.	None.
Video	EN-112109	You may see objects edged with thin colorful lines.	None.

## Getting Help
