

## Patch Notes

# Polycom® RealAccess On-Premises Edition

---

**Patch ID:** 2.2.0.1

**Released Files:**

- plcm-realaccess-sql-2.2.0-2.2.0.1-vmrk.ova
- plcm-realaccess-util-2.2.0-2.2.0.1-vmrk.ova
- plcm-realaccess-web-2.2.0-2.2.0.1-vmrk.ova

**Release Date:** September 14, 2018

## Purpose

This update to the Polycom RealAccess On-Prem Edition v2.2 software provides support for VMware vSphere® 6.5. All other features and functions are as described in the *Polycom RealAccess On-Premises Edition Release Notes v2.2*.

## Prerequisites and Configuration Considerations

Only apply this patch over the Polycom RealAccess On-Premises Edition 2.2 for VMware .ova.

No new prerequisites and no changes in configuration of parameters. Please note only the VMware support has changed. There are no changes to HyperV support.

## Functionality Affected

None. No code changes made, only repackaging of the software.

## Rollback Considerations

Please note, rollback to the previous software release is not possible. Contact Polycom support if an issue occurred that must be fixed before moving forward.

## Software Release Support Information

To report issues or get additional support for this software release, please contact 1-800-Polycom.
