Polycom RealPresence Mobile Modes of Operation

You can use RealPresence Mobile in standalone or managed mode.

- **Standalone mode** provides direct access to the configuration and settings of RealPresence Mobile. It does not require registration with a Polycom provisioning server.
- **Managed mode** provides the benefits of centralized management including centralized management of configuration, automatic distribution of runtime licenses, and access to a centralized directory server. In managed mode, you must register with a Polycom provisioning server, such as Polycom Converged Management Application™ (CMA®) 4000/5000 or Polycom RealPresence Resource Manager. The Polycom provisioning server configures RealPresence Mobile automatically.

Configure the RealPresence Mobile Application

Before you begin configuring RealPresence Mobile, get familiar with the application’s user interface. The following figures show the RealPresence Mobile main window and the in-call toolbar. See Use the In-Call Toolbar for more specific information about in-call toolbar.

**iPhone main window user interface**

- **Select call type**
- **Enter numbers**
- **Open keyboard**
- **Open dialpad**

Display the number you entered
Tap to clear the number
Delete characters entered
Places a call
Specify application settings
View connection status

View recent calls
View local address book
Configure RealPresence Mobile in Standalone Mode

Standalone mode does not require registration with a Polycom provisioning server. You need to configure RealPresence Mobile manually.

To configure RealPresence Mobile in standalone mode:

1. From your device's Application list, touch .
2. To register your product with Polycom, select the Register with Polycom check box and then enter your e-mail address. Your user information, such as your e-mail address, your device type, and the RealPresence Mobile version, will be sent to Polycom. Clear this check box if you do not want to send the information.
3. Touch Next.
4. Touch Skip sign in.
5. Touch on your device.
6. Configure the settings in the iOS Settings table.
7. Touch Done to go back the main window.
8. Enable or disable the SDP size adjustment feature. Enable this feature to shorten Session Description Protocol (SDP) size to avoid call failure caused by SDP size limitation for some users. Enter #001# from the Dialpad to enable or disable this feature.

Note: Video content, FECC, H.264 high profile, RFC2833 for DTMF, and SVC cannot be used when you enable SDP Size Adjustment, video content, FECC, H.264 high profile, RFC2833 for DTMF, and SVC cannot be used.

9. To check your connection status, touch .
10. If the gatekeeper or server registration fails, is displayed on the main window. Touch to see more information.

Provision RealPresence Mobile Using BroadSoft Device Management Server

In standalone mode, RealPresence Mobile can register to BroadSoft Device Management Server to use provisioned features. Only LDAP search is not supported.

Set up BroadSoft Device Management Server to Provision RealPresence Mobile

To configure the BroadSoft Device Management Server for provisioning RealPresence Mobile, the BroadSoft Device Management administrator needs to pay attention to the following:

● Review the sample RealPresence Mobile file named ProvisionData-template.xml released with RealPresence Mobile. The file ProvisionData-template.xml is published on Polycom Support.

● Decide what is to be provisioned in the customer deployment.

● Create your RealPresence Mobile provisioning template by defining the customer TAG set and assigning default values to each customer TAG.

● When adding a new Device Profile Type for RealPresence Mobile in the BroadSoft Device Management system, set the parameters to the values as follows:
  ➢ Set Device Access Context Name to dms.
  ➢ Set Device Access URI to POLYCOM/RPM
  ➢ Use the customer TAG set that you defined as Default System Tag Set and Tag Set.

● When adding a new Device Profile Type file for the new created iDevice Profile Type, set the parameters to the values as follows:
  ➢ Set Device Access File Format to ProvisionData.xml.
  ➢ Set Repository File Format to ProvisionData-%BWLOGIN-ID-1%.xml.
  ➢ Set File Category to Dynamic Per-Device.
  ➢ Set File Customization to Administrator and User.

After creating this Device Profile Type file, create a device profile for it.

● When adding or editing existing users for RealPresence Mobile:
  ➢ Choose Use Custom Credentials in the Authentication panel. The custom credentials will be the sign-in credentials for RealPresence Mobile.

### iOS Settings

<table>
<thead>
<tr>
<th>Options</th>
<th>Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other Settings</td>
<td>Auto-answer</td>
</tr>
<tr>
<td>Diagnostics</td>
<td>Send logs by clicking Send the log report, and then enter the recipients’ e-mail addresses. Note: You need to configure the default e-mail account on your device used to send logs.</td>
</tr>
<tr>
<td>General</td>
<td>About</td>
</tr>
</tbody>
</table>

Note: You need to configure the default e-mail account on your device used to send logs.
Bind the created device profile to the user account.
If necessary, you can specify the Custom TAGs of the user account for the provisioning. The new
values will overwrite the default values specified in the template ProvisionData.xml file.
After the configuration is done and the SRV record _dmsconfig_tcp is set on the DNS server properly,
RealPresence Mobile can detect the provisioning server automatically using users' e-mails. Users can also
specify the server when signing into RealPresence Mobile. RealPresence Mobile assumes each BroadSoft
user has its specific provisioning data. If a user signs into RealPresence Mobile on multiple devices with the
same user account, all the devices will get the same provisioning data.

Configure RealPresence Mobile in Managed Mode
After you register with a Polycom provisioning server, the provisioning server configures most of the settings
automatically such as H.323 or SIP settings. In managed mode, you can use LDAP search feature, which
is not supported under standalone mode.

To configure RealPresence Mobile in managed mode:
1. From your device's Application list, touch 🔍.
2. Enter your e-mail address. By default, your e-mail address, your device type, and the RealPresence
   Mobile version, will be sent to Polycom. When you clear the Register with Polycom check box,
   RealPresence Mobile will not send this information.
3. Touch Next.
4. Enter your user name and password. The provisioning server address is populated based on your
   e-mail address.
5. Touch Go.
6. Touch ⚙ Settings on your device.
7. Configure the settings listed in the iOS Settings table.
8. Touch Done to go back the main window.
9. Enable or disable the SDP size adjustment feature. Enable this feature to shorten Session
   Description Protocol (SDP) size to avoid call failure caused by SDP size limitation for
   some users. Enter #001# from the Dialpad to enable or disable this feature.

   Note: Video content, FECC, H.264 high profile, RFC 2833 for DTMF, and SVC cannot be used
   When you enable SDP Size Adjustment, video content, FECC, H.264 high profile, RFC
   2833 for DTMF, and SVC cannot be used.

10. To check your connection status, touch ☰.
    The provisioning server configures the rest of the settings automatically. If server registration fails.
    is displayed on the main window. Touch ☰ to see more information.

Place and Receive Calls

Using RealPresence Mobile, you can place and receive point-to-point calls. You can also join multipoint calls hosted by multipoint conferencing systems, such as Polycom RealPresence Collaboration Server, and by endpoints with multipoint capabilities, such as Polycom HDX® Series systems.

You can call contacts from your recent calls list or enter the contact numbers manually. If you register to a provisioning server, you can call contacts from your corporate directory. During a call, use the in-call toolbar to control your video, volume, and camera.

**Note: Check your service plan**

Participating in a video call in a 3G or 4G network requires sending and receiving large amounts of data. Be sure that your service plan allows a sufficient level of data transfer to support video calling.
Place Calls
You can place calls by entering a contact number directly or by using your recent calls list.

To place a call by entering a number:
1. Touch and then enter the name or number to call. You can use any of the formats shown here:
   - 2555 (SIP user name or E.164 extension for H.323)
   - stereo.polycom.com (FQDN name)
   - <user>@<domain.com> (<SIP_username>@<domain.com>)
   - 10.11.12.13##1234 (signaling IP##conference ID for H.323)
   - 10.11.12.13 (IP address, including the dots)
   - 1234@10.11.12.13 (<SIP user name>@<IP address>)
2. Select the call type, SIP or H.323.
3. To enter an extension or password, touch .
4. Touch to start the call.

To place a call from your recent calls list:
1. Touch .
2. Touch an entry to call.
   Your recent calls list can hold up to 100 entries.

Place Calls from Your Corporate Directory or Local Address Book
When using RealPresence Mobile in managed mode, which provides LDAP service, you can place calls in several additional ways. Place calls from your corporate directory or from your local address book.

Note: Registration problems
If a registration problem occurs, is displayed at the bottom of the screen. Touch for more information.

To place a call from your corporate directory:
1. Touch .
2. Click Directory.
3. Enter the name or part of the name of the contact you want to call, and then touch Search.
   You need to use more specific key word to improve the search efficient. After you enter a key word and start to search contacts, you cannot cancel this operation. Do not switch networks during directory search, otherwise the search cannot stop. To stop the search, you need to force close RealPresence Mobile.
4. Touch the contact name from the search results.
5. Touch beside the device name that you want to call.
6 Touch Place Call (H.323) or Place Call (SIP). If you cannot find the option Place Call (H.323) or Place Call (SIP), the contact may have no H.323 extension or SIP URI configured. Contact your IT administrator.

To place a call from your local address book:

1 Touch .
2 Click Local.
3 Touch the contact name from the contacts list.
4 Touch Place Call (H.323) or Place Call (SIP). If you cannot find the option Place Call (H.323) or Place Call (SIP), the contact may have no H.323 extension or SIP URI configured. Contact your IT administrator.

Manage Calls

You can use RealPresence Mobile to make, answer, reject, or end calls.

To answer a call:

» Touch Answer.

To reject an incoming call:

» Touch Decline.

To end the current call:

» Touch .

Note: Incoming call notification display

Incoming call notification is displayed only when RealPresence Mobile is the active application.

To clear the recent calls list:

1 Touch .
2 Do one of the following:
   ➢ To clear all recent calls, touch , and then touch Clear All.
   ➢ To delete one recent call entry, swipe right on the desired entry, and then touch Delete.

Use the In-Call Toolbar

During a call, touch the screen to view the in-call toolbar. Use the in-call toolbar to access additional features of the RealPresence Mobile application, for example, to switch cameras or mute your audio. See Configure the RealPresence Mobile Application for more information about the in-call toolbar window.
Toolbar Call Icons
The following table lists explains call icons.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📞</td>
<td>Incoming calls</td>
</tr>
<tr>
<td>📞</td>
<td>Outgoing calls</td>
</tr>
<tr>
<td>📞</td>
<td>Missed calls</td>
</tr>
<tr>
<td>📞</td>
<td>Poor network connection</td>
</tr>
<tr>
<td>📞</td>
<td>Unstable network connection</td>
</tr>
<tr>
<td>📞</td>
<td>Good network connection</td>
</tr>
</tbody>
</table>

Work with Content
When you are registered to a provisioning server, you can view content sent by others in the call, but you cannot share content with others.

Manage Contacts
After you register the RealPresence Mobile application to a provisioning server, you have access to LDAP service. With LDAP, you can call contacts in your corporate directory. You can also add, delete, or edit contacts in your local address book.

To add a contact from a corporate directory to your local address book:
1. Touch 📞 and then touch Directory.
2. Enter the name or part of the name of the contact you want to find, and then touch Search.
3. Touch the contact name from the search results.
4. Touch the device name of the contact, and then touch 📞.
5. Touch 📞.

To add contacts from recent calls list to your local address book:
1. Touch 📞.
2. Touch 📞 next to the contact number you want to add.
3. Touch 📞 to add the contact to your local address book.
4. Complete contact information and then touch Save.
To add a new contact to your local address book manually:

1. Touch ✉, and then touch Local.
2. Touch 📞.
3. Specify the contact information.
4. Only the display name is required. However, you must enter at least one of the following before you can call this contact:
   - H.323 Extension
   - H.323 Name
   - SIP URI

   The following table explains the contact information fields.
5. Save the information.

<table>
<thead>
<tr>
<th>Fields</th>
<th>Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Display Name</td>
<td>Name you use to identify the contact. The display name appears only on your screen, so it can be any name that is meaningful to you.</td>
</tr>
<tr>
<td>Title</td>
<td>Contact's job title.</td>
</tr>
<tr>
<td>Phone</td>
<td>Contact's phone number.</td>
</tr>
<tr>
<td>E-mail</td>
<td>Contact's e-mail address.</td>
</tr>
<tr>
<td>Location</td>
<td>Contact's location.</td>
</tr>
<tr>
<td>Device Name</td>
<td>Name or type of system.</td>
</tr>
<tr>
<td>H.323 Extension</td>
<td>Number that gatekeepers use to identify this system. Your organization's dialing plan may define the numbers you can use.</td>
</tr>
<tr>
<td>H.323 Name</td>
<td>Name that gatekeepers use to identify this system. Your organization's dialing plan may define the names you can use.</td>
</tr>
<tr>
<td>SIP URI</td>
<td>SIP URI of the system.</td>
</tr>
</tbody>
</table>

To edit a contact in your local address book:

1. Touch ✉ and then touch Local.
2. Touch the contact number you want to edit.
3. Touch Edit.
4. Edit the contact information, and then touch Save.

Note: Cannot add IP addresses to your address book
If the most recent call number is an IP address, you cannot add it to your local address book.
Note: Re-adding a contact from another directory
If you re-add a contact from your corporate directory to your local address book, your edits will be lost.

To delete a contact from your local address book:
1. Touch and then touch Local.
2. Touch the contact number you want to delete.
3. Touch Edit.
4. Touch Delete Contact.
5. Touch Delete.

To locate a contact quickly:
» Touch a letter to view names that start with that letter.

Manage Cameras
The RealPresence Mobile application also enables you to switch cameras and switch among windows during a call.

To switch cameras:
» Swipe right or left to switch to your local video, touch to switch between your front and rear cameras.

To switch among windows:
» To switch among local, people, and content windows, swipe left or right.

Note: Maximized content and window switching
When the content is maximized, you cannot switch windows.

Attend a CloudAXIS Meeting
You can attend a CloudAXIS meeting via RealPresence Mobile. RealPresence Mobile also supports CloudAXIS HTTPS tunneling for unregistered SIP AVC calls, which allows you to join a CloudAXIS meeting with limited Internet access through an HTTPS tunneling mechanism. If you are invited to a CloudAXIS meeting, you will receive a meeting invitation via e-mail.

To attend a CloudAXIS meeting:
1. Open the meeting invitation e-mail.
2. Open the web URI by clicking the link.
3 Enter your e-mail address and your name to sign into CloudAXIS as shown in the following figure.

**Sign into CloudAXIS**

![Sign in to CloudAXIS](image)

4 After you sign in, touch the RealPresence Mobile logo to launch the application. You will be in the meeting after RealPresence Mobile starts.

If you have not installed RealPresence Mobile, CloudAXIS will remind you to install RealPresence Mobile.

In the meeting, you can view the participant list by touching the **People** button on the in-call tool bar.

**Troubleshooting**

The following table lists the problems that you might encounter and the possible solutions.

**Solving Problems**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Description and Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video quality is poor.</td>
<td>Try the call again using a lower call rate. See Configure the RealPresence Mobile Application. You can also set up a private wireless network with a private key for the RealPresence Mobile application: 1 From the Applications list, touch Settings &gt; WLAN. 2 Choose your private wireless network. 3 Enter your user name and password, and touch Join.</td>
</tr>
<tr>
<td>Video is not available.</td>
<td>Ensure that you are connected to a mobile network and registered to a provisioning server. Then try the call again.</td>
</tr>
<tr>
<td>Audio only SVC call</td>
<td>When you dial into a SVC call and set the line rate to 1024 kbps or above, ensure that you use call rate higher than 128 kbps, otherwise you can only get audio in the call.</td>
</tr>
<tr>
<td>Audio is noisy in calls from one device to another.</td>
<td>If the two devices are near to each other, mute the audio of one of them.</td>
