

Patch Notes

Polycom® RealPresence® Collaboration Server

Build ID: 8.5.13.297
Released File: OVA, ISO, BIN
Release Date: July 30, 2018
Part Number: N/A

Purpose

This patch includes fixes for the following issues when applied over the RealPresence Collaboration Server 8.5.13 GA release.

<i>Issue ID</i>	<i>Category</i>	<i>Description</i>
EN-91515	Cascading/Security	Cascaded calls can enter conferences without entering a passcode.
EN-88964	Content	Content sharing fails when an endpoint shares content as another endpoint joins the call.
EN-68723	Stability	Running calls disconnected from all conferences from master MCU on 75% stable load
EN-85264	Stability	Dial-out connect/disconnect at 2 cps results in a confparty core dump after 13 hours.
EN-88355	General	Excessive logging of kernel log dump found.
EN-96147	Stability	RealPresence Collaboration Server (RMX4000) rebooted during meetings.
EN-68678	Stability	RealPresence Collaboration Server (RMX) 1800 rebooted after 48 hours when HD SIP calls connect/disconnect at the rate of 2CPS.
EN-82888	Stability	Media card rebooted, followed by a confparty core, after 48 hours when encrypted audio/video calls connect/disconnect at the rate of 2 CPS in the RealPresence Collaboration Server (RMX) 4000.
EN-83503	Stability	Media Cards Crashed after four days of Dial-out and Dial-in connect /disconnect load

These patch notes document only the changes from the prerequisite generally available (GA) release. Refer to the Release Notes for that GA release for the complete release documentation.

Prerequisites and Configuration Considerations

For information on prerequisites and configuration, refer to the *Polycom RealPresence Collaboration Server (RMX) 1500/1800/2000/4000 Administrator Guide Version 8.5*.

Limitations

The following table lists the issue added to the limitations specified in *Polycom RealPresence Collaboration Server 1800/2000/4000/Virtual Edition Release Notes Version 8.5.13*.

Issue ID	Category	Description
EN-97529	Video	Conference participants sometimes see a cell with distorted video for approximately 5 seconds when the <code>ENABLE_CASCADED_LINK_TO_JOIN_CONF_WITHOUT_PASSWORD</code> flag is set to <code>Never</code> and they join a call that uses a cascade link without a password.

Installation Notes

For information on installation, refer to the *Polycom RealPresence Collaboration Server (RMX) 1500/1800/2000/4000 Administrator Guide Version 8.5*.

Rollback Considerations

For information on rollbacks, refer to the *Polycom RealPresence Collaboration Server (RMX) 1500/1800/2000/4000 Administrator Guide Version 8.5*.
