Introduction

SE 200 V3.0.2/CMA V4.0 can be used to manage RMX 1000 V1.1.1 , include device management, conference scheduling, and conference management.

This guide mainly takes detailed explanation about how SE 200 V3.0.2/CMA V4.0 integrated manages RMX 1000.

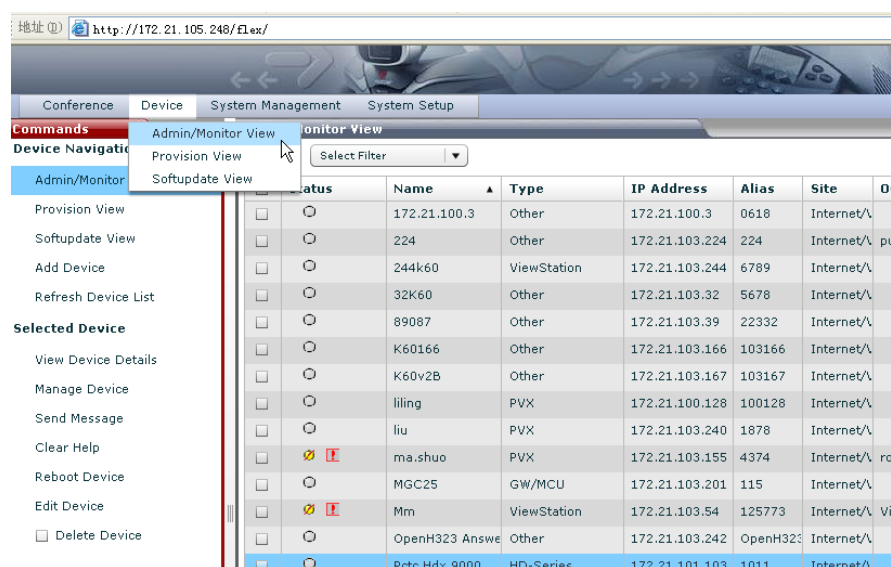

The specific contents are as follows:

- Manage Device
- Schedule conference
- Manage conference:
- Change layout
- Extend conference
- Add participant
- Connect/disconnect participant
- Remove participant
- Mute/unmute participant
- Terminate conference

Manage Device

Add Device

- 1 Click **Device | Admin/Monitor View**, See the following drawing:

- 2 Click **Add Device** listed in **Commands | Device Navigation**, there will pop-up **Add New Device** page.

Set information as follows:

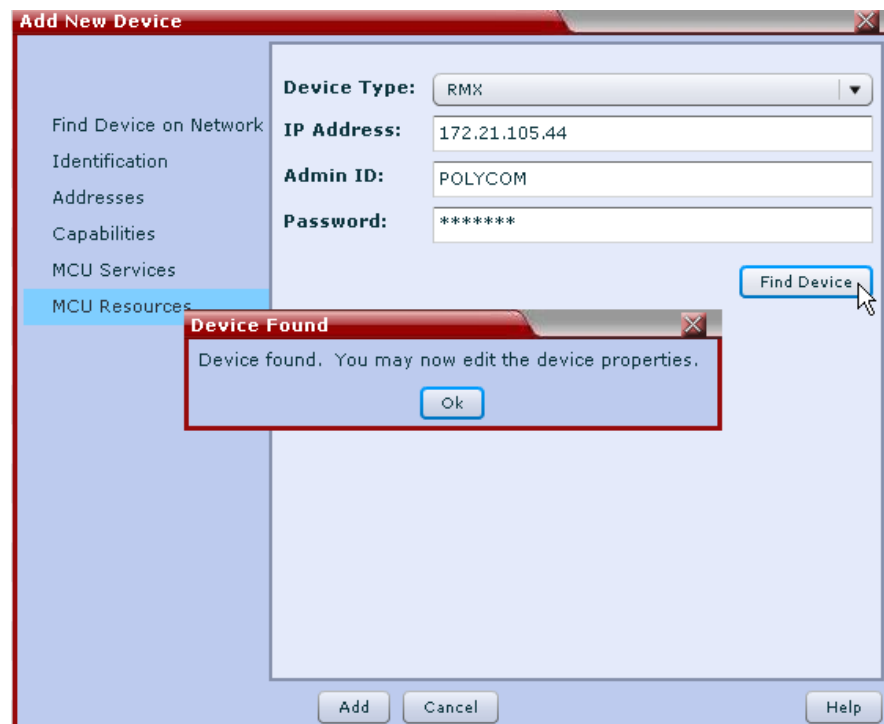

- a. Select **Device Type** to **RMX**,
- b. Set **IP Address** to a valid IP of RMX 1000 device,
- c. Set **Admin ID** to a valid username of the RMX 1000 device,
- d. Set **Password** to a valid password of the RMX 1000 device,

See the following drawing:

- 3 Click **Find Device**, RMX 1000 device will be found, and system will pop-up a **Device Found** message.

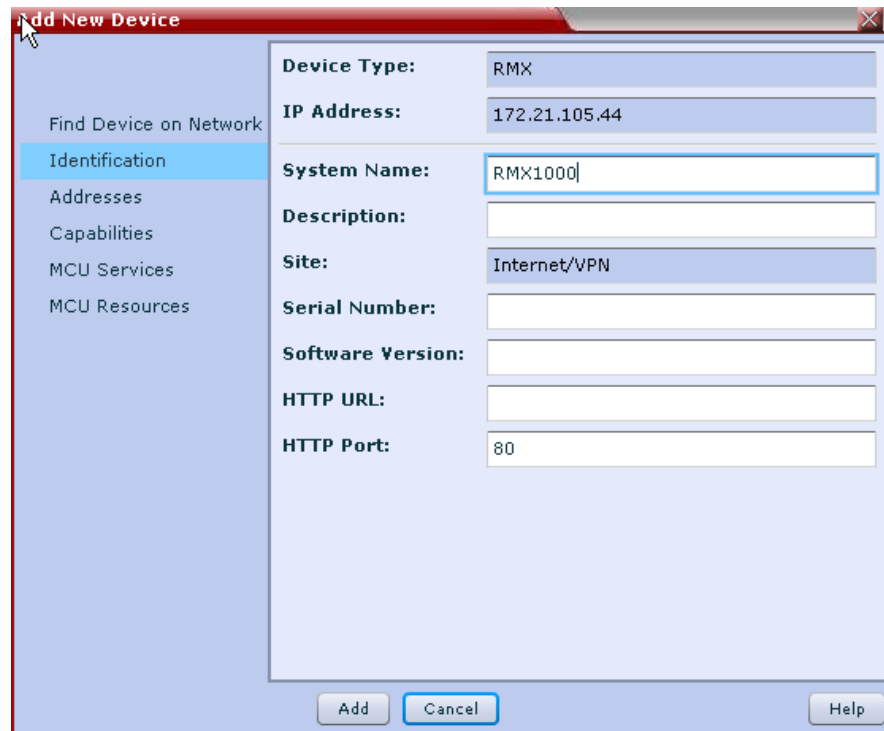

See the following drawing:

- 4 Click **OK**.
- 5 Click **Identification**; set **System Name** to a valid value. Here we set to

RMX1000.

See the following drawing:

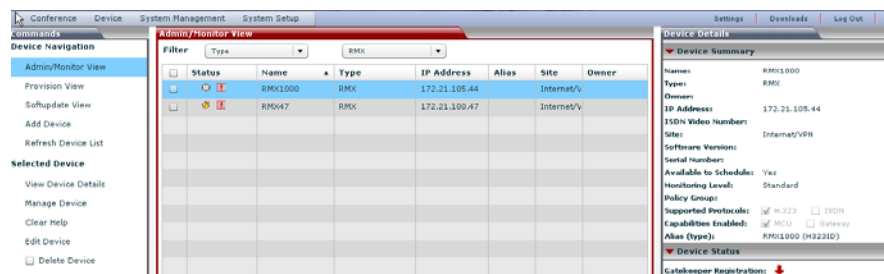

- 6 Click **Add**, **Add New Device** command will submit, and if no error message pop-up, means the RMX 1000 device is added successfully.

View Device status

- 1 Click **Admin/Monitor View**, select **Filter** to Type, and select another drop-down box behind **Filter** to RMX, device named RMX1000 lists in the device list.
- 2 View **Status** of RMX1000 in the list.

See the following drawing:

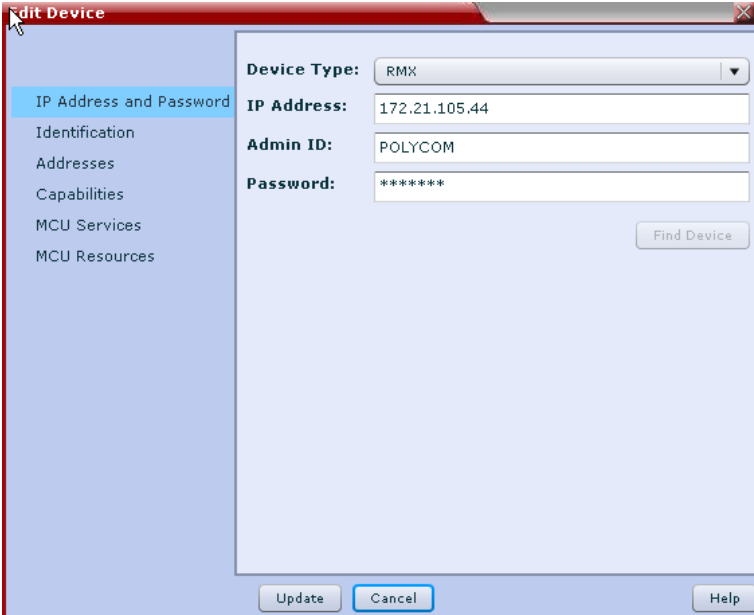

- 3 Select RMX1000 in the list, and view **Device Summary**, device details is same as user set.

Also user can click **View Device Details** to view the device details.

Edit Device detail

- 1 Select RMX1000 in the device list, then click **Edit Device**, **Edit Device** page will pop-up, user can edit the device details.
