Purpose

Patch 2 for DMA 6.2.2 (i.e. v6.2.2.2 or v6.2.2_P2) contains code changes to address the following issue:

- ❑ DMA-15314 Endpoints not showing under DMA GK registration

Prerequisites/Configuration Considerations

- Systems may have Polycom DMA 7000 v6.0.x, v6.1.x or v6.2.x installed
- When upgrading from DMA 6.0.x, 6.1.x or 6.2.x to 6.2.2_P2, the system will not preserve the call history information. To keep this data, backup the databases, upgrade the DMAs, and then restore the databases.
