

# Patch Release Notes

## Polycom® RealPresence® Distributed Media Application™

---

**Release label:** 6.3.2\_P1  
**Built on version:** Polycom DMA System v6.3.2  
**Released file(s):** Upgrade file for 6.1.x, 6.2.x and 6.3.x

---

### Issues Resolved

Patch 1 for DMA 6.3.2 (i.e. v6.3.2.1 or v6.3.2\_P1) has been augmented with the following items:

- DMA-16042 Add a unique SNMP engine ID for each DMA node
- DMA-16045 DMA roll script does not archive compressed server logs
- DMA-16047 Ensure diagnostic data is intact when server logs are rolled

### Prerequisites/Configuration Considerations

- Systems may have Polycom DMA v6.1.x, v6.2.x or v6.3.x installed
- When upgrading from DMA 6.1.x, 6.2.x or 6.3.x to 6.3.1\_P2, the system will not preserve the call history information. To keep this data, backup the databases, upgrade the DMAs, and then restore the databases.
