

## What's New in Release 1.6.1.105426

Maintenance release only, no new functionality.

### Workflow Server Software Upgrade

The steps to upgrade the Workflow Server application are as follows:

1. Stop the windows Workflow Server Service
2. Backup the c:\programdata\polycom\workflowServer\ folder
3. Uninstall Workflow Server via Windows Programs and Feature. Note the configuration files will not be removed

Install the new version by double clicking the MSI file. Once complete, confirm you can login to the application using Chrome web browser on the Windows Server, browsing to <https://localhost/admin>

### 1.6.1 Resolved Issues

The table below details the fixes available for One Touch Dial Workflow Server 1.6.1. Each version is inclusive of the fixes from prior versions.

Build Number	Summary	Polycom Reference
1.6.1.6785	GA Release of 1.6.1	N/A
1.6.1.7846	Resolved an issue whereby Workflow Server app would crash with Java Heap Memory Leak error. Resolved by up updating the Node.js version from 6.9.1 to 7.4.0.	IE-18815 / IE-18937
1.6.1.28714	Increased log file size generation from 10MB per file to 150MB per file	N/A
1.6.1.28714	Fixed an issue whereby OTD would not create a DMA scheduled VMR when an ongoing Skype for Business meeting was forwarded to a mailbox associated with a videoconferencing device.	N/A
1.6.1.28714	Fixed an issue whereby the impersonation subscription to room mailboxes would time out and not re-establish	N/A
1.6.1.28714	Fixed an issue whereby the OTD status > connected devices count was incorrectly reporting two connections for each connected Polycom codec.	N/A
1.6.1.28714	Fixed an issue whereby the OTD agent would stop performing the calendar push to a Cisco device if the DMA returned an error while attempting to create a corresponding DMA scheduled conference.	N/A
1.6.1.28714	Fixed an issue whereby the impersonation feature enabling updating the meeting invite on behalf of the meeting organizer with additional text was updating the individual occurrences instead of the series master for reoccurring meetings	N/A

1.6.1.28714	Fixed an issue whereby OTD would throw an error and restart if a retrieved meeting matched the Skype for Business match rule but the extended properties were not present in the invite	N/A
1.6.1.28714	Fixed an issue whereby OTD was incorrectly deleting DMA scheduled conferences with an end time in the future. Issue prevented participants from being able to join an ongoing conferencing	N/A
1.6.1.28714	Enhanced the OTD logic for creating DMA scheduled conferences. Now DMA scheduled conferences are only updated if the attributes of the scheduled conference do not match (for example the scheduled start or end time is changed).	N/A
1.6.1.28714	Fixed an issue whereby OTD would incorrectly create two scheduled DMA conferences for reoccurring meetings (one for the series master and one for the occurrence). Fixed so that OTD no longer creates an occurrence for the series master.	N/A
1.6.1.28714	Fixed an issue whereby the impersonation feature to update the meeting invite on behalf of the meeting organizer with additional text would be applied to invites multiple times.	N/A
1.6.1.28714	Fixed an issue whereby the OTD Skype for Business match rule was sending the incorrect number to be dialed to Polycom and Cisco devices if the organizer was enabled for Skype for Business dial-in conferencing and Outlook was configured for German language.	N/A
1.6.1.37430	Add match rule for Polycom RealConnect for Office 365 (AQUA) service	N/A
1.6.1.45695	Fixed an issue whereby application would hang whilst servicing requests from Polycom endpoints at peak times	IE-20256
1.6.1.46610	Fixed an Issue whereby OTD would intermittently delete DMA scheduled conferences in a skype for business workflow	N/A
1.6.1.50433	Fixed an issue whereby Polycom endpoints configured with Active Directory authentication credentials could not retrieve their calendar if OTD was configured to pass through the credentials to Exchange	IE-19699
1.6.1.58928	Fixed an issue whereby the match rule type attendeeAddress would not update a DMA scheduled conference if the matched participant was added or removed from an invitation	N/A
1.6.1.58928	Fixed an issue whereby if the extended properties of Skype for Business meetings were not present, the environments > advanced properties > doSkypeLookup attribute would fail to detect the dial-in conferencing ID within the body of the meeting invitation.	IE-20731
1.6.1.88070	Fixed an issue whereby if the extended properties of an Office 365 Skype for Business Online meetings were not present, the environments > advanced properties > doSkypeLookup attribute would fail to assign the Skype Focus URI to the DMA scheduled conference. The issue was caused by a change to the Office 365 <a href="https://meet.lync.com">https://meet.lync.com</a> web pages.	IE-21333
1.6.1.105426	Fixed an issue, whereby the fix implemented for IE-21333 doSkypeLookup would prevent HDX and Group Series calendar state from registering, if the doSkypeLookup attribute was enabled for O365 Dedicated Exchange deployments.	IE-21333

1.6.1. 105426	Fixed an issue whereby OTD application impersonation feature, for updating meeting invitations with join information would add erroneous characters to the meeting invite.	IE-20572
