

Patch Notes

RealPresence Access Director

Patch ID: 4.2.4.1.0 (4.2.4 P1)
Affected version: 4.2.4 OVA only
Release date: 1/18/2017

Purpose

This patch is to address the following issue:

Issue #	Description
EDGE-1946	<p>Issue: Iptables packaged only in fresh install of 4.2.4 OVA is incorrect which leads to SNMP, ssh & UI access from any NIC</p> <p>Important Note:</p> <p>This does not impact RPAD VMware VM upgrades to 4.2.4</p> <p>This does not impact RPAD appliance or RPAD Hyper-V installs/upgrades</p> <p>This does not impact any other OVA except 4.2.4 OVA</p> <p>Solution: If you have already done a fresh install of 4.2.4 OVA then you can upgrade to 4.2.4.1.0. If you are planning a fresh install of a RPAD VMware VM then use 4.2.4.1.0 OVA</p>

Prerequisites and Configuration Considerations

Pre-requisites: 4.1 or higher

Use the .bin file if upgrading from 4.1.0

Use the .upg file if upgrading from 4.2.x

Installation Notes

- Please take a **backup of the configuration** and download it onto a local pc or server before proceeding with the upgrade.
