

Accordent PresenterPRO™ v6.0 Release Notes

New Features:

- Full install as well as separate install builds for each application in the suite:
 - Accordent PresenterPRO
 - Accordent Encoder Controller
 - Accordent PowerPoint Add-in
- Added Presentation GUID generation to enable published presentations to have a unique Identifier.
- Presentation wizard enhancements:
 - Networked Skin directory option – allows the interface library to be centralized and shared for multiple copies of Accordent PresenterPRO. To use the feature, there is a registry key called UNCSkinPath that is used to point to the UNC skin directory.
 - “Back” button added to the distribution page so that if any errors in publishing occur, a user can correct the issue quickly and re-publish.
 - Application version tag <<@APPVER@>> added inside Accordent PresenterPRO interfaces that will parse to the version of Accordent PresenterPRO that was used to publish the presentation. This enables the Accordent Media Management System™ to know what tool version created the content and what format to expect.
 - Adjustable HTTP communication response wait time – the default is 5 seconds and can now be increased (e.g. For slow responding encoders) by adding a registry key wizard: "HTTPWAITTIME" = 5000 (“1000” = 1 second).
- Presentation Manager enhancements:
 - Auxiliary “out of band” enabled to be able to push to all multiple publish points - UNC, FTP & SFTP.
 - Adjustable FTP/SFTP keep-alive feature added within the Presentation Wizard - under Advanced FTP Settings, new "KeepAliveTime" registry key value with a default of 500 seconds (“1” = 1 second).
 - Adjustable HTTP communication download wait time added for built-in Accordent PresenterPRO registration download tab. Add registry key to "Manager" - "xmltransfertime" = 2500 (“1000” = 1 second).
- Encoder Controller enhancements:
 - Windows Media Encoder Max Packet size for limiting multicast packet size on the network.
 - MP3 encoder to enable Podcast recording from within Accordent PresenterPRO.
 - Enhanced encoding options for RealNetworks support.
- Archive Wizard enhancement:
 - Enhanced Accordent PresenterPLUS™/Accordent PresenterPRO interoperability for editing and republishing Accordent presentations.
- Accordent PowerPoint Add-in enhancement:
 - New synchronization capabilities from all views within Microsoft PowerPoint™ including Normal View as well as Slideshow mode.
