

Technical Bulletin 39784

Support For SoundPoint® IP Expansion Modules on SoundPoint® IP Phones

This technical bulletin provides detailed information on which Expansion Modules are supported on each of the SoundPoint IP 601, 650, and 670 phones.

This information applies to SoundPoint IP 601, 650, and 670 phones only.

Introduction

With the recent introduction of the Color Expansion Module, there are now three types of Expansion Modules that can be connected to SoundPoint IP 601, 650, and 670 phones. The supported combinations are shown in the following section, [Supported Combinations](#).

For more information on SoundPoint IP phones and Expansion Modules, refer to the appropriate Quick Start Guide and User Guides at <http://www.polycom.com/support/voip/>.

Supported Combinations

These SoundPoint IP phone/Expansion Module combinations are supported as of the SIP release shown below:

	Expansion Module	Backlit Expansion Module	Color Expansion Module
IP 601	SIP 1.6.0	SIP 2.2 ¹	SIP 3.0.2 ²
IP 650	SIP 2.0.3	SIP 2.2	SIP 3.0.2 ³
IP 670	SIP 3.0.2	SIP 3.0.2	SIP 3.0.2

1. In this configuration, the Backlit Expansion Module's backlight is disabled.
2. In this configuration, the Color Expansion Module's display is monochrome and the backlight is disabled.
3. In this configuration, the Color Expansion Module's display is monochrome.

Note

In SIP 3.0.2, all SoundPoint IP phone/Expansion Module combinations are operational. There is no guarantee that all combinations in the table will continue to be supported in future firmware releases. However, these combinations will continue to be supported:

- SoundPoint IP 601 and Expansion Module
- SoundPoint IP 650 and Backlit Expansion Module
- SoundPoint IP 670 and Color Expansion Module
