Security Updates

Refer to the [Poly Security Center](#) for information about known and resolved security vulnerabilities.

UC Software Distributed Files

You can download the software package for Trio systems in ZIP file format and place the package on a provisioning server to provision your devices. Each software package contains configuration files and a `sip.ld` file for each Trio system.

The `sip.ld` files are model-specific and are as follows:

- Trio C60: `311-86240-001.sip.ld`

If you're provisioning your phones centrally using configuration files, download the corresponding resource file and extract the configuration files to the provisioning server. Make sure to maintain the folder hierarchy in the ZIP file.

Poly Trio Pass-through Application

The Poly Trio Pass-through application build ID is **1.0.0.0067**. This version of the application supports UC Software version 5.9.5AC for Trio systems and Windows 10.

Installing UC Software

You can install UC Software for Trio systems using a provisioning server. You can also install UC Software on the Trio C60 using a USB flash drive.

You can configure features for the Trio system using configuration files on a provisioning server, using the system web interface (Web Configuration Utility), or on the phone's local interface. See the *Poly Trio Solution Administrator Guide* for more information on configuring features.

Interoperability

This section includes information on Trio system server interoperability with partner solutions.

Trio Optimized for Zoom Rooms

Trio C60 systems optimized for Zoom Rooms act as a controller for Zoom Rooms via the system's touch user interface and provide audio for Zoom Room meetings through the built-in speakers and microphones.
