## Release Notes: SoundPoint/SoundStation IP - BootROM Hardware Support

This release is compatible with the following Polycom products:

- SoundPoint IP 300
- SoundPoint IP 500
- SoundPoint IP 600
- SoundStation IP 4000 SIP

### BootROM Upgrade/Downgrade Path

Due to some enhancements that have been added to the bootROM software, it is not always possible to go to certain versions even if the hardware is compatible. The following table lists the upgrade/downgrade paths that are not supported:

From	Upgrade	Downgrade
1.x	2.x	
2.0.x, 2.1.x	2.5.x, 2.6.x	1.x
2.2.x		1.x, 2.0.x, 2.1.x
2.3.x, 2.4.x		1.x, 2.0.x, 2.1.x, 2.2.x
2.5.x, 2.6.x		1.x, 2.0.x, 2.1.x, 2.2.x

### Detailed Description of Software Revisions

#### *Version 2.6.1*

**Added or Changed Features - None.**

**Removed Features - None.**

#### **Corrections**

- 9447: Phone fails to boot if the boot server is not present and the application is not self-provisioning.
- 9537: When using TFTP, the phone does not display the “Phone could not contact the boot server” screen.
- 9581: Phone does not format the file system if the application does not fit.

## **Release Notes: SoundPoint/SoundStation IP - BootROM Version 2.6.0**

### **Added or Changed Features**

- 5761: Added support for the SoundStation IP 4000 SIP.
- 7175: Made TFTP file provisioning consistent with FTP.
- 8232: Added DHCP VLAN Discovery.
- 8760: Added support for the SoundPoint IP 301.

**Removed Features - None.**

### **Corrections**

- 6782: Invalid <MAC>.cfg can hang the phone.
- 8548: Phone waits 2.5 minutes for SNTP to fail.

## **Version 2.5.1**

**Added or Changed Features - None.**

**Removed Features - None.**

**Corrections - None.**

## **Version 2.5.0**

### **Added or Changed Features**

- 5116: Added support for the SoundPoint IP 300.

**Removed Features - None.**

### **Corrections**

- 5191: FTP provisioning fails if the FTP server root directory is not readable.
- 5623: Hitting the left arrow key before the cursor advances moves the cursor 2 spaces.
- 5668: Spaces in the admin password are ignored.
- 5754: Phone did not log out of FTP server after a bootROM update.

## Release Notes: SoundPoint/SoundStation IP - BootROM

### Known issues

The following problems are known to exist and will be addressed in a future release:

<b>ID</b>	<b>Issue</b>	<b>Workaround</b>
8535	BootROM DHCP client does not send a DHCPDECLINE.	Do not configure duplicate IP addresses in the DHCP address range.
8553	BootROM ignores short DHCP packets.	Ensure DHCP packets are at least 328 bytes.

## Release Notes: SoundPoint/SoundStation IP - BootROM

### Distribution

The following files constitute the 2.6.1 distribution of the SoundPoint IP bootROM application. For centrally provisioned systems, copy these files to the boot server.

<b>Files</b>	<b>Description</b>
bootrom.ld	BootROM executable, revision 2.6.1.0003
bootrom.ver	BootROM version stamp for upgrading with TFTP from older bootROM's.
