

Soundstation VTX 1000® Software Version 1.60.026 Release Notes

Date: November 08, 2006

Specific Release: SoundStation VTX 1000 software version 1.60.026

Subject: Release notes describing changes from Version 1.60.022 to 1.60.026.

Software Improvements/Bug Fixes

Audio

1. Automatic Gain Control (AGC) setting was previously implemented on a per call basis. Change has been made so that AGC setting stays implemented until user re-configures (On or Off) or power is disrupted.

UI

1. DTMF output from the speaker provides audible feedback to user for numeric keypad inputs during a Wideband call.
