Thank you for choosing the SoundPoint IP 450, a full-duplex, hands-free SIP desktop phone. This unit provides business telephony features and functions such as multiple call appearances, call hold, transfer, and conference over an IP network.

This guide provides everything you need to quickly use your new phone. Be sure to verify with your system administrator that your network is prepared for configuring your SoundPoint IP 450 phone. As well, be sure to read the Getting Started with Your Phone and Regulatory Notices sections of this guide before you set up and use the SoundPoint IP 450 phone. You can also find this information at http://www.polycom.com/support/voicedocumentation/.

- Calling 5–5
This chapter provides basic installation instructions and information for obtaining the best performance with the SoundPoint IP 450 desktop phone.

The SoundPoint IP 450 provides a powerful, yet flexible IP communications solution, delivering excellent voice quality. The high-resolution graphic display supplies content for call information, multiple languages, directory access, and system status. The SoundPoint IP 450 supports advanced functionality, including multiple call and flexible line appearances, HTTPS secure provisioning, presence, custom ring tones, local conferencing, applications, and Polycom® HD™ Voice technology.

For the package parts list and instructions on how to assemble your phone, refer to the SoundPoint IP 450 Quick Start Guide.

This chapter contains:

- Registering Your Phone
- Features of Your Phone
- Before You Use Your Phone

To customize your phone, refer to Customizing Your Phone on page 1-1. To read about the phone’s basic features, refer to Using the Basic Features of Your Phone on page 3-1. To read the phone’s advanced features, refer to Using the Advanced Features of Your Phone on page 4-1.

If you require additional information or assistance with your new phone, contact your system administrator.

For information on supported headsets, go to www.polycom.com/support/voice and enter “Headset Compatibility List” in the Knowledge Base text box.
Registering Your Phone

Generally, your phone will be deployed with multiple other phones. In this case, your system administrator will configure the phone parameters beforehand, so that after you set up your phone, the phone will be registered and ready to use.

If your phone is not part of a large phone deployment, your phone may not be registered after you set it up. Before you use your phone, you or your system administrator will have to register it. For detailed information on how to register your phone after you install it, refer to “Quick Tip 44011: Registering Standalone SoundPoint IP and SoundStation IP Phones” at http://www.polycom.com/usa/en/support/voice/soundpoint_ip/VoIP_T echnical_Bulletins_pub.html .

Features of Your Phone
The features of your SoundPoint IP 450 phone are:

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Message Waiting Indicator</td>
</tr>
<tr>
<td>2</td>
<td>Line Indicators</td>
</tr>
<tr>
<td>3</td>
<td>Line/Speed Dial Key</td>
</tr>
<tr>
<td>4</td>
<td>Arrow Keys</td>
</tr>
<tr>
<td>5</td>
<td>Speakerphone</td>
</tr>
<tr>
<td>6</td>
<td>Feature Keys</td>
</tr>
<tr>
<td>7</td>
<td>Microphone Mute</td>
</tr>
</tbody>
</table>

**Item 1: Message Waiting Indicator**
Alert for voice and text (instant) messages.

**Item 2: Line Indicators**
Individual multi-color LEDs display the dynamic call state and remote user status (busy lamp field (BLF) and presence). The mapping is:
- Solid green—An active call is in progress.
- Fast flashing green—There is an incoming (ringing) call.
- Flashing green—The call is held by the other party.
- Flashing red—The call is on hold.
- Solid red—The line is busy remotely (shared lines)

**Item 3: Line/Speed Dial Key**
Use these keys to activate up to three lines or speed dials that can be assigned to your phone.

**Item 4: Arrow Keys**
Scroll through displayed information or options. Select a field of displayed data.

**Item 5: Speakerphone**
Allows for hands-free communication during calls.

**Item 6: Feature Keys**
Access important features using these keys.
- **Menu**
  Access local (your phone) and global (your organization) features.
- **Messages**
  Access and manage text and voice messages.
- **Redial**
  Dials most recently dialed party.

**Item 7: Microphone Mute**
Mutes audio transmission locally during calls and conferences.
<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| 8    | Hands-free Microphone  
Pick up audio during hands-free calls. Place your phone on a hard, flat surface for best results. |
| 9    | Volume Keys  
Adjusts the volume of the handset, headset, speaker, and ringer. |
| 10   | Dial Pad  
Provides the 10 digits, the alphabetic characters, and special characters available in context-sensitive applications. |
| 11   | Headset  
Allows you to place and receive calls through an optionally connected headset. |
| 12   | Hold  
Holds an active call or resumes a held call. |
| 13   | Speaker  
For ringer and hands-free audio output. |
| 14   | Soft Keys  
These keys are automatically labeled to identify their context-sensitive functions. |
| 15   | Graphic Display  
Shows information about calls, messages, soft keys, time, date, and other relevant data.  
- Caller display information—first party, second party, number of calls  
- Information status scrolling list in order of precedence highest to lowest  
Associated line icons are described in the following table. |
| 16   | Hookswitch |
Icons associated with the line keys appear on the screen and represent:

<table>

</table>
Before You Use Your Phone

Navigating Menus and Entering Data

To help you navigate menus and enter data, use these tips:

- To scroll through lists, use △ and ▼, or hold down △ and ▼.
- Press the * key to page up. Press the # key to page down. Use these shortcuts when lists appear on more than one page.
- To exit from any menu, press Menu.
- To return to the previous menu, press the Back soft key.
- To cancel the current edit session, press the Cancel soft key.
- To delete text, press the << soft key.
- To view additional soft keys, press the More soft key.
- To select a value from a list, use ◄ and ►.
- Use the dial pad keys to navigate through and make selections in numbered menu lists.
- The navigation guide on right-hand side of the screen shows which arrow keys can be used at a particular sublevel.

For example, you can use ▼ and ▲ at this point.
• To enter text using the dial pad, press the number keys one or more times. For example, for ‘A’ press 2 and for ‘C’ press 222. When in text entry mode, the title will show whether keys will generate digits (1), upper-case (A), or lower-case (a) characters—use the 1/A/a soft key to change—and whether keys will generate ASCII, Latin, Cyrillic, Katakana, or Unicode characters—use the Encoding soft key to change.

Information Status

The top line of the screen (or graphic display) shows status information. It appears as a scrolling list if there is more than one message. The number of messages in the list also appears. In order of precedence from highest to lowest, the messages are:

• Popup text (for example, network errors)
• Do Not Disturb text
• Missed call text or second incoming caller display
• Prompt text (for example, “Enter number”) 
• Time and date text

The following figures provide some examples:
Customizing Your Phone

You can customize your SoundPoint IP 450 desktop phone by adjusting the setting for time and date, display contrast, and ring type, for example. You can add contacts to the phone’s directory manually or from call lists. You can handle incoming calls from different contacts in different ways.

This chapter provides basic operating instructions for customizing your SoundPoint IP 450 phone. This chapter contains:

• Configuring Basic Settings
• Managing Call Lists
• Managing Contacts
• Managing Incoming Calls

Some customizations of your SoundPoint IP 450 phone are performed by your system administrator. These include:

• Supporting Multiple Lines
• Supporting Multiple Line Keys Per Line
• Supporting Shared Lines

To read about the phone’s basic features, refer to Using the Basic Features of Your Phone on page 3-1. To read about the phone’s advanced features, refer to Using the Advanced Features of Your Phone on page 4-1.

If you require additional information or assistance with your new phone, contact your system administrator.

Configuring Basic Settings

You can configure the following basic settings through use of \text{Menu}:

• Appearance of the time and date
• Display contrast
• Backlight intensity
• Headset Memory Mode
• Headset hookswitch selection
• Ring type
• Language support (localization)
• Background pattern

You can mute the microphone and adjust the volume using separate keys.

Changing the Appearance of Time and Date

The time and date appears on the screen of the SoundPoint IP 450 phone. If the phone cannot obtain a time and date from the call server, the display will flash. Contact your system administrator if either the time or date is incorrect.

You can select from various formats for the time and date display. Select and set options that are right for you. You can also disable the time and date display, so the time and date do not display on the phone screen.

To configure the time and date formats:

1. Press Menu.
2. Select Settings > Basic > Preferences > Time & Date.
3. Select from Clock Date, Clock Time, Clock Order, or Enable/Disable.
4. Scroll through the options under each of these selections.
5. Press the Select soft key to confirm your choice. The following figure shows the Clock Time menu.

![Clock Time Menu]

6. Press Menu to return to the idle screen.

### Changing the Display Contrast

To adjust the contrast on the screen to a comfortable level:

1. Press Menu.
2. Select Settings > Basic > Contrast.

![Contrast Menu]

3. Press the Up or Down soft keys to increase or decrease the display contrast.

**Note** You can also use the volume keys to increase or decrease the display contrast.

4. Press the Ok soft key.
5. Press Menu to return to the idle screen.
Changing the Backlight Intensity

Backlight intensity on the SoundPoint IP 450 phone has three components:

- Backlight On
- Backlight Idle
- Maximum Intensity

You can modify the Backlight On intensity and the Backlight Idle intensity separately. You can select high, medium, low, and off levels for both.

When you modify the Maximum Intensity, you are modifying the entire backlight intensity scale. For example, if you decrease the Maximum Intensity, the low, medium, and high values for both Backlight On intensity and the Backlight Idle intensity decrease.

The Backlight On intensity applies for the following events:

- Any key press
- Hookswitch release
- Incoming calls
- Ending a call, holding a call, resuming a call by the other party
- A voice or instant message received

If you do not press any keys on the phone after 20 seconds of the backlight turning on, the backlight dims (or changes) to medium in the following cases:

- A call is in progress
- A call is on hold
- There is an incoming call (ringing)
- There is an outgoing call (ringing back)
- Any menu shows on the display

In all other cases, the Backlight Idle intensity applies.

To modify the backlight intensity:

1. Press 📈. 
2. Select Settings > Basic > Backlight Intensity.

3. Select Backlight On Intensity.

4. Scroll to select high, medium, low, or off, and then press the Select soft key.
   The default level is medium.

5. Select Backlight Idle Intensity.

6. Scroll to select high, medium, low, or off, and then press the Select soft key.
   The default level is low.

7. Select Maximum Intensity.

8. Press the Up or Down soft keys to increase or decrease the backlight intensity.

9. Press the Ok soft key.
10. Press \text{Menu} to return to the idle screen.

**Enabling the Headset Memory Mode**

This feature is especially useful for permanent or full-time headset users.

**To permanently enable the Headset Memory Mode:**

1. Press \text{Menu}.
2. Select Settings > Basic > Preferences > Headset... > Headset Memory...
3. Scroll to select Enabled, and then press the Select soft key.

4. Press \text{Menu} to return to the idle screen.

Repeat steps 1 to 4 to select Disabled and turn Headset Memory Mode off.

**To activate Headset Memory Mode:**

\[>>\] Press \text{Menu} twice.

The flashing headset icon on the screen or a flashing headset key indicates that the headset mode is activated. Pressing \text{Menu} or the Answer soft key to receive a call will now connect to your headset automatically.

**Selecting the Correct Headset for Electronic Hookswitch**

This feature allows you to answer your phone when you are using a headset.

For information on supported headsets to provide electronic hookswitch features for placing, answering, and ending calls, go to www.polycom.com/support/voice and enter "Headset Compatibility List" in the Knowledge Base text box or contact your system administrator.
To select a headset that supports electronic hookswitch:

1. Press \( \text{Menu} \).
2. Select Settings > Basic > Preferences > Headset > Analog Headset Mode.
3. Scroll to select your headset, and then press the Select soft key.

<table>
<thead>
<tr>
<th>Analog Headset Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. ☑ Regular Mode</td>
</tr>
<tr>
<td>2. ☐ Jabra DHSG</td>
</tr>
<tr>
<td>3. ☐ Plantronics Mode</td>
</tr>
</tbody>
</table>

4. Press \( \text{Menu} \) to return to the idle screen.

**Selecting the Ring Type**

You can select different ring types to distinguish lines or to distinguish your phone from your neighbor’s phone.

To change the incoming ring type:

1. Press \( \text{Menu} \).
2. Select Settings > Basic > Ring Type.
3. If multiple lines are configured on your phone, first select the line to change from the list using the arrow keys.
4. Scroll to select the desired ring type.

To hear the selected ring type, press the Play soft key.

<table>
<thead>
<tr>
<th>Ring Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. ☐ Silent Ring</td>
</tr>
<tr>
<td>2. ☑ Low Trill</td>
</tr>
<tr>
<td>3. ☐ Low Double Trill</td>
</tr>
</tbody>
</table>

5. Press the Select soft key to change to the selected ring type.
6. Press \( \text{Menu} \) to return to the idle screen.
Changing the Language

Many languages are supported by the SoundPoint IP 450 phone.

To change the language:

1. Press \[\text{Menu}\] .
2. Select Settings > Basic > Preferences > Language.
3. Scroll to highlight the language you want.

   You can choose from Chinese, Danish, Dutch, English (Canada), English (United Kingdom), English (United States), French, German, Italian, Japanese, Korean, Norwegian, Polish, Portuguese, Russian, Slovenian, Spanish, and Swedish.

4. Press the Select soft key.

   Text that appears on the screen will change to the language of your choice.

5. Press \[\text{Menu}\] to return to the idle screen.
Changing the Background

You can change the picture or design that appears on the screen. A default background displays when the phone starts up (shown below). For more information on selections, contact your system administrator.

To change the graphic background:

1. Press \[Menu\].
2. Select Settings > Basic > Preferences > Backgrounds.
3. Scroll to highlight the background you want.
4. Press the Select soft key.
5. Press \[Menu\] to return to the idle screen.

One of the background selections is shown below.
Muting the Microphone

During a call, press \[\text{m} \]. The Message Waiting Indicator turns red and a microphone on the screen indicates that the other party (or parties) cannot hear you.

Microphone Mute applies to all modes: Handset, Headset, and Hands-free Speakerphone. You can still hear all other parties while mute is enabled.

To turn off Microphone Mute, press \[\text{m} \] again.

Adjusting the Volume

Press \[\text{VOL} \] to adjust receiver volume during a call. Pressing these keys in the idle state adjusts the ringer volume.

Note

To conform to regulatory requirements, handset and headset volume will return to a preset level after each call, but your system administrator can change this. Hands-free Speakerphone volume settings will be maintained across calls.

Managing Call Lists

Your phone maintains local lists of missed, received, and placed calls. Each list contains 100 entries.

Press \[\text{Menu} \], and then select Features > Call Lists > Missed Calls, Received Calls, or Placed Calls. The following shows a Placed Calls list.

<table>
<thead>
<tr>
<th>Placed Calls</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Adam Kirk</td>
</tr>
<tr>
<td>2811</td>
</tr>
</tbody>
</table>

Manage the call list by doing the following:

- To edit the phone number, press the Edit soft key.
- To return the call, press the Dial soft key.
- To view information about the call, press press the More soft key followed by the Info soft key.
- To store the contact in the Contact Directory, press the More soft key followed by the Save soft key.
• To delete the call from list, press the More soft key followed by the Clear soft key.

Press Menu to return to the idle screen.

**Note**
Press the Right arrow key from the idle screen to access the Placed Calls list. Press the Left arrow key from the idle screen to access the Received Calls list. Press the Down arrow from the idle screen to access the Missed Calls list. You can use these shortcuts while placing calls or performing transferring and conferencing functions.

**Note**
You can manually clear all call lists. They are automatically cleared when you restart the phone.

---

**Managing Contacts**

You can store a large number of contacts in your phone's local contact directory. Contact your system administrator for the exact number.

You can dial or search for a contact in this directory. You may be able to add, edit, and delete contacts.

You may have access to portions of your corporate directory through your phone. The contacts that you can see are determined by your system administrator. You can place calls to contacts in your corporate directory. You may be able to add contacts from the corporate directory to your local contact directory.

**Adding Contacts**

You can add contacts to your contact directory:

• Manually

• From a call list

• From your corporate directory
Adding Contacts Manually

To add a contact to the local contact directory manually:

1. Press Menu.
2. Select Features > Contact Directory.
3. Press the More soft key.
4. Press the Add soft key.
5. Enter first and/or last name of the contact from the keypad.
   Use the 1/A/a soft key to select between numeric and upper/lower case alphanumeric modes.
   Use the Encoding soft key to access special characters in other languages.
6. Enter a contact number.
   This is a required field and it must be unique (not already in the directory).
7. (Optional.) Change the Speed Dial Index.
   It is automatically assigned to the next available index value.
   Valid speed dial index values are from 1 to 9999. If you enter a speed dial index that already exists, “Speed dial index already exists” appears. If you enter an invalid value, “Speed dial index invalid” appears.
   For more information, refer to Assigning Speed Dial Keys on page 3-19.
8. (Optional.) Change the Ring Type and Divert Contact.
These fields may be left blank.

For more information on setting the Ring Type field, refer to Distinguishing Calls on page 2-18.

For more information on diverting contacts, refer to Diverting Calls on page 2-19.

9. (Optional.) Change the Auto Reject, Auto Divert, Watch Buddy, and Block Buddy.

Scroll to switch between Enabled and Disabled settings.

For more information on setting the Auto Reject field, refer to Rejecting Calls on page 2-19. For more information on setting the Watch Buddy and Block Buddy fields, refer to Managing Buddies on page 4-5.

10. Press the Save soft key.

11. Press Menu to return to the idle screen.

Adding Contacts From Call Lists

To add a contact to the local contact directory from a call list:

1. Do one of the following:

   – Press Menu.

   Select Features > Call Lists > Missed Calls, Received Calls, or Placed Calls as desired.

   – Press , , or to access the desired call list.

2. Scroll to highlight the contact.

   You can also use the * key to Page Up and the # key to Page Down.

3. Press the More soft key, and then the Save soft key to save the contact in the phone’s directory.

4. Press Menu to return to the idle screen.
Adding Contacts From the Corporate Directory

To add a contact to your local contact directory from the corporate directory:

1. Press \[\text{Menu}\].
2. Select Features > Corporate Directory.
3. Search for the contact.
   Refer to Searching for Contacts in the corporate directory on page 2-16.
4. Press the \text{View} soft key.
   The contact’s information appears on the screen.

5. Press the \text{Save} soft key to save the contact in the local contact directory.
   “Entry saved” appears on the screen. Only the first name, last name, and
   phone number are saved.
   If the contact already exists in the contact directory, “Entry already exists”
   appears.

6. Press \[\text{Menu}\] to return to the idle screen.

Editing Contacts

To edit a contact in the local contact directory:

1. Press \[\text{Menu}\].
2. Select Features > Contact Directory.
3. Scroll to highlight the contact.
   You can also use the * key to page up and the # key to page down.
4. Press the **Edit** soft key.

5. Edit the contact information.

6. Press the **Save** soft key.

7. Press **Menu** to return to the idle screen.

---

### Deleting Contacts

**To delete a contact from the local contact directory:**

1. Press **Menu**.
2. Select **Features > Contact Directory**.
3. Scroll to highlight the contact.
   
   You can also use the * key to page up and the # key to page down.

4. Press the **More** soft key twice, and then press the **Delete** soft key.

   The contact is deleted from the directory.

5. Press **Menu** to return to the idle screen.

---

### Placing Calls to Contacts

**To place a call to a contact in the local contact directory:**

1. Press **Menu**.
2. Select **Features > Contact Directory**.
3. Scroll to highlight the contact.
   You can also use the * key to page up and the # key to page down.

4. Press the Dial soft key.

To place a call to a contact in the corporate directory:

1. Press Menu.
2. Select Features > Corporate Directory.
3. Search for the contact.
   Refer to Searching for Contacts in the corporate directory on page 2-16.
4. Press the View soft key.
   The contact’s information appears on the screen.

5. Press the Dial soft key.

Searching for Contacts

To search for a contact in the local contact directory:

1. Press Menu.
2. Select Features > Contact Directory.
3. Press the More soft key, and then the Search soft key.
4. Using the dial pad, enter the first few characters of the contacts’ first or last name.
5. Press the **Search** soft key again.
   
   You can dial any successful matches from the resulting information on the screen.

To search for a contact in the corporate directory:

1. Press the **Menu** button.
2. Select **Features > Corporate Directory**.

   **Note**
   
   When you first access the corporate directory, the message “Directory update in progress” appears momentarily. Then the corporate directory entries appear. If no corporate directory entries appear, review your search criteria. Your criteria may be set to exclude all corporate directory entries.

3. Search for the contact in one of the following ways:
   
   – Scroll to highlight the contact.
     
     You can also use the * key to Page Up and the # key to Page Down.
   
   – Press the **Search** soft key, and then enter the first few letters or numbers of the first name, last name, or any other parameter displayed in the list. Press the **Submit** soft key.

   ![Search (A/Ascii)](image1)

   – Using the dial pad, enter the first few characters of the contact's last name.
     
     The characters that you enter appear on the second line of the screen.

   ![Search](image2)

   The entries whose last name begin with the characters that you entered (or are alphabetically next to the characters that you entered) appear on the screen.
Managing Incoming Calls

You can distinguish incoming calls by setting distinctive rings for contacts in your contact directory, sending particular calls directly to your voice mail, or transferring particular calls to another party.

Distinguishing Calls

You can customize your phone so that you can distinguish different parties by ring type.

Note

This feature is local to the phone, and may be overridden by your organization’s settings. For more information, contact your system administrator.

To set a distinctive ring type for a contact:

1. Press \Menu\.
2. Select Features > Contact Directory.
3. Scroll to highlight the contact.

   You can also use the * key to page up and the # key to page down.

4. Press the Edit soft key, and then scroll down to the Ring Type field.

5. Enter the number corresponding to one of the ring types available.

   For more information, refer to Selecting the Ring Type on page 2-7.

6. (Optional.) To remove an existing value, press the << soft key.

7. Press the Save soft key.

8. Press \Menu\ to return to the idle screen.
Customizing Your Phone

Rejecting Calls

You can customize your phone so that incoming calls from a particular party are immediately sent to your voice mail.

**Note**

Rejecting calls is not available on shared lines.

**To send incoming calls from a contact directly to voice mail:**

1. Press \[ \text{Menu} \].
2. Select **Features > Contact Directory**.
3. Scroll to highlight the contact.
   
   You can also use the * key to page up and the # key to page down.
4. Press the **Edit** soft key, and then scroll down to the Auto Reject field.

5. Scroll to select Enabled.
6. Press the **Save** soft key.
7. Press \[ \text{Menu} \] to return to the idle screen.

Diverting Calls

You can customize your phone so that incoming calls from a particular contact are transferred directly to a third party.

**To divert incoming calls from a particular contact:**

1. Press \[ \text{Menu} \].
2. Select **Features > Contact Directory**.
3. Scroll to highlight the contact.
   
   You can also use the * key to page up and the # key to page down.
4. Press the **Edit** soft key, and then scroll down to the **Divert Contact** field.

```markdown
<table>
<thead>
<tr>
<th>Ring Type:</th>
<th>Divert Contact:</th>
<th>Auto Reject:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1/Ascii)</td>
<td>Disabled</td>
<td></td>
</tr>
</tbody>
</table>
```

5. Enter the number of the party to whom you want to divert the call.
6. Scroll down to the **Auto Divert** field.
7. Scroll to select **Enabled**.
8. Press the **Save** soft key.
9. Press the **Menu** key to return to the idle screen.

## System Customizations

The following section details customizations of your SoundPoint IP 450 phone that are performed by your system administrator.

### Supporting Multiple Lines

Your SoundPoint IP 450 phone can support up to 3 lines.

Typically, the top-most Line Key is reserved for the principal directory number (DN) of the phone.

Depending on how your administrator sets up your phone, the screen could resemble one of the following figures:

- One line, 3163
• Two lines, 3165 and 3166

### Supporting Multiple Line Keys Per Line

Each line on the phone can be configured to have more than one Line Key associated with it. This enhances call visualization and simplifies call handling. If this is the case, the screen could resemble the following figure:

Incoming calls to this line will be distributed evenly among the available Line Keys. Similarly, outgoing calls will be distributed.

Your phone can be configured to have a combination of lines with a single Line Key and lines with multiple Line Keys.

### Supporting Shared Lines

Your SoundPoint IP 450 supports shared lines.

**Note**

Shared lines are an optional feature and may not be supported on your particular system. For more information, contact your system administrator.

A shared line is indicated by a different line icon. In the following figure, the line 3165 is private and the line 3166 is shared.
If two phones share a line, an incoming call to that number will cause both phones to ring. The call can be answered on either phone but not both. Calls on shared lines can be transferred, put on hold, or added to a conference.

**Note**

Call Forwarding is not available on shared lines.
Do Not Disturb (DND) on shared lines disables the ringing option only, the visual indication is still in place.
Using the Basic Features of Your Phone

Your SoundPoint IP 450 desktop phone is designed to be used like a regular phone on a public switched telephone network (PSTN). You can place calls, transfer a call to someone else, or conduct a conference call.

At any time, at most one active call may be in progress on your phone. The active call is the one that has audio associated with it. There may be multiple other calls:

- On hold
- In an “Incoming call” or “Ringing” state

This chapter provides basic operating instructions for the SoundPoint IP 450 phone. This chapter contains instructions on:

- Placing Calls
- Answering Calls
- Ending Calls
- Redialing Numbers
- Placing Calls on Hold
- Hosting Conference Calls
- Transferring Calls
- Forwarding Calls
- Enabling Do Not Disturb
- Assigning Speed Dial Keys
- Using Voice Mail

To customize your phone, refer to Customizing Your Phone on page 2-1. To read about the phone’s advanced features, refer to Using the Advanced Features of Your Phone on page 4-1.
If you require additional information or assistance with your new phone, contact your system administrator.

Placing Calls

You can place a call in many ways using your SoundPoint IP 450 phone:

- using the handset
- using the speakerphone
- using the headset

You can also dial the number first, and then choose the method you will use to speak to the other party.

You can search the call lists, the local contact directory or the corporate directory and dial from the search results page. For more information, refer to Managing Call Lists on page 2-10 and Managing Contacts on page 2-11.

During a call, you can alternate between Speakerphone Hands-Free, Headset, or Handset modes by pressing the or keys, or picking up the handset.

The call duration of active calls is visible within the active call window on the screen. In the figure below, the call to Don Blue has lasted 19 seconds.

To place a call using the handset:

Do the following steps in any order:

- Pick up the handset.
- Dial the number using the dial pad.
To place a call using Hands-Free Speakerphone mode:

Do one of the following:

- With the handset on-hook, press \[\text{NewCall}\], \[\text{Dial}\], or the \[\text{NewCall}\] soft key to obtain a dial tone.
  - Dial the number using the dial pad.

- With the handset on-hook, dial the number using the dial pad.
  - Press \[\text{Dial}\], \[\text{Send}\], or the \[\text{Dial}\] soft key.

To place a call using the headset:

Do one of the following:

- With the optional headset connected, press \[\text{NewCall}\] or the \[\text{Dial}\] soft key to obtain dial tone.
  - Press \[\text{Dial}\].
  - Dial the desired number using the dial pad.

- With the optional headset connected, dial the desired number using the dial pad.
  - Press \[\text{Dial}\].

Note: You can also dial using the SIP URL or IP address. To obtain the IP address of your phone, press the Menu key, and then select Status > Platform > Phone. The IP address is listed together with other phone information. The maximum URL or IP address length is 32 characters. For example, \[\text{10.3.0.42, sip:jane@polycom.com}\]. Press the URL soft key and enter the URL or IP address. Use * for “.” and # for “@”. Then press the Send soft key to complete the call.

Your phone may not support SIP URL or IP address dialing. Contact your system administrator.

Note: If “Handsfree mode disabled” appears on the screen after you press the speakerphone key, your system administrator has disabled the speakerphone on your phone.

Note: You can also dial using the SIP URL or IP address. To obtain the IP address of your phone, press the Menu key, and then select Status > Platform > Phone. The IP address is listed together with other phone information. The maximum URL or IP address length is 32 characters. For example, \[\text{10.3.0.42, sip:jane@polycom.com}\]. Press the URL soft key and enter the URL or IP address. Use * for “.” and # for “@”. Then press the Send soft key to complete the call.

Your phone may not support SIP URL or IP address dialing. Contact your system administrator.

Note: You can also dial using the SIP URL or IP address. To obtain the IP address of your phone, press the Menu key, and then select Status > Platform > Phone. The IP address is listed together with other phone information. The maximum URL or IP address length is 32 characters. For example, \[\text{10.3.0.42, sip:jane@polycom.com}\]. Press the URL soft key and enter the URL or IP address. Use * for “.” and # for “@”. Then press the Send soft key to complete the call.

Your phone may not support SIP URL or IP address dialing. Contact your system administrator.
Answering Calls

When you are not in another call, you can answer a call in three ways:

- Using the handset
- Using the speakerphone
- Using the headset

The steps for answering an incoming call when you are in another call are different if your phone is configured for:

- A single Line Key per line
- Multiple Line Keys per line

If your phone is configured with multiple call appearances, refer to Using Multiple Call Appearances on page 4-1 for instructions on how to answer a call.

Note

You can ignore incoming calls by pressing the Reject soft key (for private lines) or the Silence soft key (for shared lines) or the Do Not Disturb key. The Do Not Disturb mode stays active when the call ends and remains active until you press the Do Not Disturb key again.

You can forward incoming calls by pressing the Forward soft key. For more information, refer to Dynamic Forwarding on page 3-18.

When your phone is configured with a silent ring, press the ringing Line key or the Answer soft key to answer the call. If your handset is off-hook, the call is routed to the handset. If your handset is on-hook, the call is routed to the speaker.

Answering When Not in Another Call

In all cases, the active call will appear on the screen showing call duration and destination.
To answer a call using the handset:

>> Pick up the handset.

To answer a call using Hands-Free Speakerphone mode:

>> Do one of the following:

- Press \( 	ext{Hands-Free} \).
- With the handset on-hook, press \( 	ext{Hands-Free} \) (next to the flashing green status indicator).
- Press the Answer soft key.

To answer a call using the headset:

>> Press \( 	ext{Headset} \).

If Headset Memory Mode is activated, press \( 	ext{Headset Memory} \) or the Answer soft key.

Answering When in Another Call

If you have an active call, and an incoming call arrives on the same line, do one of the following:

- If your phone is configured for a single Line Key per line:
  - You may hear a call waiting tone, and you will see the second call appearance. Caller information for the incoming call appears on the screen.

- If your phone is configured for multiple Line Keys per line:
  - You may hear a call waiting tone, the second Line Key indicator fast flashes green, and an incoming call icon appears. Caller information for the second Line Key appears on the bottom line of the screen.

- If your phone is configured for shared lines:
  - You may hear a call waiting tone, the second Line Key indicator will fast flash green, and an incoming call icon appears on the second Line Key.

Note: If your phone is configured for shared lines, the Reject soft-key is replaced by a Silence soft key and there is no Forward soft-key. To stop the incoming call from ringing, press the Silence soft key.
To answer an incoming call on a line configured for a single Line Key:

Do one of the following:

- Press [Hold] or the Hold soft key to place the original call on hold. The incoming call is answered.
- Scroll down to access the new call. Press the Answer soft key. The original call is placed on hold.

Note: You can forward incoming calls by pressing the Forward soft key. For more information, refer to Dynamic Forwarding on page 3-18.

To answer an incoming call on a line configured for multiple Line Keys:

Do one of the following:

- Press [Hold] next the flashing green indicator. The first call is placed on hold and the second call become the active call.
- Press [Hold] or the Hold soft key to place the original call on hold. Press the Answer soft key.

Note: You can forward incoming calls by pressing the Forward soft key. For more information, refer to Dynamic Forwarding on page 3-18.

To answer an incoming call on a shared line:

1. Answer the incoming call.
2. Press [Hold] or the Hold soft key.

Anyone on another phone configured to use the same shared line may take the call by selecting the Line Key associated with the call on hold (represented by a flashing red LED).
Ending Calls

To end a call:

Do one of the following:

- If you are using the handset, press the EndCall soft key or replace the handset.
- If you are using a headset, press \( \text{End Call} \).
- If you are using the speakerphone, press \( \text{End Call} \).

Redialing Numbers

To redial the last call placed from your phone:

Press \( \text{Redial} \).

A call to your last placed call is attempted.

To redial a previously placed call, refer to Managing Call Lists on page 2-10.

Placing Calls on Hold

During a call, press \( \text{Hold} \) or the Hold soft key. The hold icon will display on the line key label.
Press \[Hold\] again or the \[Resume\] soft key to retrieve the call. The registered line icon appears as the line indicator.

**Note**
The Hold feature typically generates music or a beeping tone. Therefore, avoid putting a conference call on hold.

### Multiple Calls on Hold

If multiple calls are on hold on a single Line Key, use \[\uparrow\] and \[\downarrow\] to switch between the calls, and then press the \[Resume\] soft key to retrieve the desired call.

If more than two calls are on hold on a single Line Key, an indication appears on the screen, for example “2/3”, indicating that this is the second call out of three calls.

If calls are on hold on more than one Line Key, you can view the details of the calls on any Line Key by pressing and holding the Line Key for more than two seconds. If a Line Key is depressed for less than one second, the first call on hold on that Line Key will be retrieved.

### Hosting Conference Calls

You can create a conference with other parties using the phone’s local conference feature. You can create a conference at any time between an active call and a call on hold (on the same or another line) by pressing the \[Join\] soft key. The conference management feature allows you to view all parties in a conference call. From the Manage Conference page, you can add, hold, remove, and mute specific conference participants.

**Note**
The conference management feature is an optional feature and may not be supported on your particular system. For more information, contact your system administrator.

This section provides the following step-by-step instructions:

- Setting Up Conference Calls
• Managing Conference Calls
• Adding Parties to Conference Calls
• Joining Conferences
• Splitting Conference Calls
• Ending Conference Calls

Setting Up Conference Calls

To set up a conference call:

1. Call the first party.

2. Press the **Confrnc** soft key to create a new call.
   The active call is placed on hold.

   **Note**
   You can either dial the phone number directly or search for the number in the Contact Directory or Call Lists. For more information, refer to Placing Calls on page 3-2, Searching for Contacts on page 2-16, or Managing Call Lists on page 2-10.

3. Call the second party.

4. When the second party answers, press the **More** soft key, and then the **Confrnc** soft key again to join all parties in the conference.

   **Note**
   If configured for single key-press conferences, all conference participants hear the dial tone and ringback when the conference host places a call to a new party.
5. Press **Confrnc** soft key to add another party to the conference. The first and second party are put on hold.

6. Call the third party.

7. After the third party answers, press the **More** soft key, and then the **Confrnc** soft key again to join all parties in the conference.

A conference similar to this one will now exist.

---

**Managing Conference Calls**

You are currently in a conference call. The screen, like the one shown below, is displayed on your phone.
To manage a conference call:

1. Press the **Manage** soft key.
   
The Manage Conference page appears.

2. Do one of the following:
   
   - To add a new party, press the **Add** soft key.
     
     Call another party as you would using the **Conf** soft key (outside the conference management feature). The other parties are put on hold.

     After the new party answers, press the **More** soft key, and then the **Conf** soft key again to join all parties in the conference.

   

   **Note**

   The **Add** soft key appears only if you can add more parties to the conference call. Your system administrator determines the maximum number of conference participants. The default number is three. For more information, contact your system administrator.
To mute a party, select the party, then press the **Far Mute** soft key.

The muted party can hear all parties, but no party can hear the muted party.

If you press 🎤 instead of the **Far Mute** soft key, all other parties can hear each other, but they cannot hear you.

Press the **UnMute** soft key to un-mute the party.

To place a party on hold, select the party, and then press the **Hold** soft key.

The held party cannot hear any parties and no party can hear the held party.

Press the **Resume** soft key to return the party to the conference.

If the held party presses 🎤 on their phone, the party will remain on hold within the conference even if you press the **Resume** soft key.

To remove a party from the conference, press the **Remove** soft key.

The party is removed from the conference. To return the party to the conference, press the **Add** soft key (refer to the first optional step above).

To do other actions, press the **More** soft key.

Press the **Info** soft key to view more information about the selected party.

Press the **Back** soft key to exit the conference management feature.
Adding Parties to Conference Calls

You are currently hosting a conference call between a number of parties.

To add a party to a conference call using the Join soft key:

1. From the Manage Conference page, press \Hold or the Hold soft key.
   The other parties in the conference call are placed on hold.

   **Note**
   If configured for local conference hold, the other parties in the conference call can continue to speak with each other while you place the new call.

2. Press the New Call soft key.
3. Place a call to a new party.
4. After the new party answers, press the Join soft key.
   All parties in the conference call can now hear each other.
Joining Conferences

To join two conferences:

Previously you set up two separate calls. Only one conference can be active at a time.

>> From the either call (the one on hold or the active one), press the Join soft key.

Both calls are joined into a single three-way conference.

Splitting Conference Calls

To split a conference call:

>> From the Active Conference page, press the More soft key, and then the Split soft key to split the conference.

All calls are split into individual calls and put on hold.

Ending Conference Calls

To end a conference call:

>> From the Active Conference page, press the EndCall soft key or hang up.

The other parties will continue to be connected.

Transferring Calls

A call can be transferred in one of three ways:

• Consultative transfer — The party to whom you want to transfer the call answers their phone before you transfer the call or hang up. You can consult with them before completing the transfer.
  — Refer to Performing a Consultative Transfer on page 3-15.

• Blind transfer — The call is automatically transferred after you dial the number of the party to whom you want to transfer the call.
  — Refer to Performing a Blind Transfer on page 3-15.

• Attended transfer — The parties are automatically connected to each other after you exit the conference.
— Set up a conference call and then end your participation. For more information, refer to Hosting Conference Calls on page 3-8.

**Performing a Consultative Transfer**

**To transfer a call:**

1. During a call, press the `Transfer` soft key.  
   The active call is placed on hold.

2. Do one of the following:
   - Enter the number to which you want to transfer the call.
   - Refer to Placing Calls on page 3-2.

3. As soon as you hear the ring-back sound or after the party answers (and you speak to the party), press the `Transfer` soft key.

You can talk privately to the party to which you are transferring the call before the transfer is completed.

If you are using a handset, the transfer can be completed by putting the handset on the cradle.

You can cancel the transfer before the call connects by pressing the `Cancel` soft key.

**Performing a Blind Transfer**

**To perform a blind transfer:**

1. During a call, press the `Transfer` soft key.
2. Press the **Blind** soft key.

![Blind Transfer Screen]

3. Do one of the following steps:
   - Enter the number to which you want to transfer the call.
   - Refer to **Placing Calls** on page 3-2.

At this point, the call is connected to the number to which you are transferring them.

### Forwarding Calls

You can configure your phone so that all incoming calls are forwarded to another party (refer to **Static Forwarding**). You can also forward calls while your phone rings (refer to **Dynamic Forwarding**).

You can forward all incoming calls to another party while Do Not Disturb is enabled on your phone. For more information, contact your system administrator.

**Note**

Call Forwarding is not available on shared lines.
This feature is local to the phone, and may be overridden by call server settings.
For more information, contact your system administrator.

#### Static Forwarding

To **forward all incoming calls to another party**:

1. From the idle screen, press the **Forward** soft key.

![Forwarding Type Select]

1. Always (Disabled)
2. No Answer (Disabled)
3. Busy (Disabled)
2. If multiple lines are configured on your phone, select the line to forward from the list using the arrow keys.

3. Scroll to select the forwarding type you want to change, and then press the **Select** soft key. The options are:
   - **Always** — To forward all incoming calls
   - **No Answer** — To forward unanswered incoming calls
   - **Busy** — To forward calls that arrive when you are already in a call

4. Depending on your selection:
   a. If you selected **Always**, enter a number to forward all future incoming calls to.
   b. If you selected **No Answer**, enter a number to forward all unanswered incoming calls to and how many rings to wait before forwarding (one ring is approximately six seconds). A value of 2 is recommended.
   c. If you selected **Busy**, enter a number to forward all future incoming calls to when you are already in another call.

   **Note**
   You can also enter the SIP URL or IP address. For more information on using a SIP URL or IP address, refer to **Placing Calls** on page 3-2

5. Select the **Enable** soft key to confirm call forwarding.
A moving arrow appears on the line label to confirm call forwarding is enabled.

**To disable call forwarding:**

1. From the idle screen, press the **Forward** soft key.
2. If multiple lines are configured on your phone, select the line to forward from the list using the arrow keys.
3. Scroll to select the forwarding type you want to change and then press the **Select** soft key.
4. Press the **Disable** soft key.

When the idle screen return, the regular icon appears as the line indicator.

**Dynamic Forwarding**

**To forward an incoming call to another party:**

1. When the phone rings, press the **Forward** soft key.
2. Enter a number to forward the incoming call to.
3. Press the **Enable** soft key.

The incoming call is forwarded to the other party. If call forwarding is disabled, all future calls will not be forwarded and forwarding will remain disabled.

**Enabling Do Not Disturb**

To prevent the phone ringing (from incoming calls), you can select Do Not Disturb.

**Note**

This feature is local to the phone, and may be overridden by call server settings.

For more information, contact your system administrator.
To enable Do Not Disturb:

Press Menu, then select Features > Do Not Disturb.

A flashing icon and text on the screen indicate that Do Not Disturb is enabled.

Calls received while Do Not Disturb is enabled are logged in the Missed Calls list unless configured to be forwarded to another party by your system administrator.

To disable Do Not Disturb:

Press Menu, then select Features > Do Not Disturb.

Multiple Lines and Do Not Disturb

If multiple lines are configured on your phone, Do Not Disturb can be set on a line-by-line basis from the menu using the arrow keys. For more information, contact your system administrator. When Do Not Disturb is enabled for a particular line, a flashing “X” displays beside the line indicator.

Assigning Speed Dial Keys

You can associate contacts with Line Keys for single touch dialing of frequently used numbers. Speed Dial entries are consecutively placed next to assigned Line Keys on the phone. When a new entry is added to the Contact Directory, it is automatically assigned the next available speed dial index and the next available line key.
In the figure below, the phone has one line key, and two available speed dial keys (assigned to Adam and Tom). To dial Adam or Tom, press the associated line key.

### Assigning New Speed Dial Keys

**To add or edit a speed dial index for an existing contact:**

1. Press `Menu`.
2. Select `Features > Contact Directory`.
3. Scroll to highlight the contact.
   - You can also use the * key to page up and the # key to page down.
4. Press the `Edit` soft key.

5. Do one of the following:
   - Enter the next available speed dial index.
   - Delete the existing speed dial index by using ` Enter ` followed by ` Exit ` and then enter a new speed dial index.

   Valid speed dial index values are from 1 to 9999. If you enter a speed dial index that already exists, “Speed dial index already exists” appears. If you enter an invalid value, “Speed dial index invalid” appears.
6. Press the `Save` or `Cancel` soft keys to accept or cancel changes.
7. Press `Menu` to return to the idle screen.

**Note**

To quickly access a list of speed dial index numbers, press the **Up Arrow** key from the idle screen.
To assign a new speed dial key:

1. Press and hold an unassigned .

   A new empty entry in the contact directory is automatically opened allowing contact information to be added.

2. Press the More soft key, and then press the Add soft key.

3. (Optional.) Enter contact information.

   Use the 1/A/a soft key to select between numeric and upper/lower case alphanumeric modes.

   Use the Encoding soft key to access special characters in other languages.

4. Do one of the following:
   
   - Enter a contact number.
     
     The number must be unique (not already in the directory).
   
   - Enter a contact string where:
     
     The number must be unique
     “p” indicates 1 second delay
     “,” indicates a 2 second delay
     
     For example, your organization voice mail system is accessible through 7700 and your voice mail password is 2154. If you enter “7700,,2154” as the contact string, you could use the speed dial key to access your voice mail.

5. Change the Speed Dial Index field.

   The index can be any value between the next available index value and the maximum (value of 9999).

   Polycom recommends that you assign speed dial index values consecutively. For example, if you assign the third Line Key to the speed dial index value “2”, assign the fourth Line Key to the speed dial index value “3”.

6. Press the Save soft key.

7. Press  to return to the idle screen.
Using Voice Mail

Note

Voice mail is an optional feature configured on the call server and may not be supported on your particular system. For more information, contact your system administrator.

Screen options may vary with your application. Voice mail may be accessible with a single key press. Contact your system administrator about this option.

You can access voice mail messages from your phone. Your voice mail is saved in a centralized location.

Your phone indicates the presence of new voice mail messages by a flashing Message Waiting Indicator LED on the front of the phone and a visual notification on the screen. If your phone has multiple lines, an individual line indicator icon indicates voice mail messages on that line.

A stutter dial tone in place of normal dial tone indicates that one or more voice messages are waiting at the message center.

To listen to voice messages:

1. Press Messages.

   If multiple lines are configured on your phone, select the line to retrieve messages from.

2. Follow voice or visual prompts on the screen to retrieve your messages.
Using the Advanced Features of Your Phone

This chapter provides operating instructions for the advanced features of the SoundPoint IP 450 desktop phone. This chapter contains instructions on:

- Using Multiple Call Appearances
- Using Text Messaging
- Using Buddy Lists
- Restarting Your Phone

To customize your phone, refer to Customizing Your Phone on page 2-1. To read about the phone’s basic features, refer to Using the Basic Features of Your Phone on page 3-1.

If you require additional information or assistance with your new phone, contact your system administrator.

Using Multiple Call Appearances

When multiple call appearances is set up, you can see information for more than one call at one time. For example, if you have an active call, you can see information for an incoming call as well.

For example, the following figure shows an active call with Tom Davis on line 3163.
The following figure shows an incoming call from Adam Kirk on the same line.

To answer an incoming call when configured for multiple call appearances:

Do one of the following:

- Press \[\text{Hold}\] or the \text{Hold} soft key to place the original call on hold.

- Press \[\text{\ding{128}}\] to access the new call.

Answer the incoming call.

This original call is placed on hold and the incoming call becomes the active call.

Your phone can display two call appearances at one time. If more than two calls are taking place on the same line, a counter displays on the display. Use the down arrow to access additional calls, or “appearances”.

To place an additional call on the same line, place the active call on hold, and then press the \text{New Call} soft key.

\section*{Using Text Messaging}

You can send and receive text messages using your phone. Text messaging is supported in real-time. Your phone indicates text messages by a flashing Message Waiting Indicator LED on the front of the phone and, optionally, a visual notification on the screen.
To read text messages:

1. Do one of the following steps:
   - Press \textit{Messages}.
     Select \textit{Instant Messages}.
   - Press \textit{Menu}.
     Select \textit{Features \textgreater Messages \textgreater Instant Messages}.
   - Press the \textit{InstMsg} soft key.

2. If multiple lines are configured on your phone, scroll to select the line to retrieve messages from.
   The first message received displays last.

3. (Optional.) Do one of the following:
   - Press the \textit{Next} or \textit{Prev} soft keys to cycle through messages in order.
   - Press the \textit{More} soft key to access the \textit{Delete, Reply, and New} soft keys.

4. Press \textit{Menu} to return to the idle screen.

To send a text message:

1. Do one of the following:
   - Press \textit{Messages}.
     Select \textit{Instant Messages}.
   - Press \textit{Menu}.
     Select \textit{Features \textgreater Messages \textgreater Instant Messages}.

Note: Screen options may vary with your application. Text messaging may be accessible with a single key press. Contact your system administrator about this option.
2. If multiple lines are configured on your phone, scroll to select the line to retrieve messages from.

3. Press the New soft key.

4. Enter the number.
   Use the 1/A/a soft key to alternate between numeric and upper/lower case alphanumeric modes.

5. Press the Ok soft key.

6. Do one of the following:
   — To choose from various pre-scripted short messages, press the Select soft key.
   — To compose a custom message, press the Edit soft key.
     Use dial pad keys to cycle through the character set. Use keys 1, *, 0, and # to select special characters.

7. Press the Send soft key.

8. Press \( \text{Menu}\) to return to the idle screen.

**Using Buddy Lists**

A buddy list is a list of users/devices whose status or “presence” you can monitor. Users update their presence setting (for example, “Be right back”, “Busy”, or “Out to lunch”), and you can view their status in real-time from your phone.

Your phone can “watch” the status of up to eight other phones or 48 buddies. These other phones form your “buddy list”. Your phone displays the status of your buddies in real time. Your phone can be “watched” by up to eight other phones.

If your SoundPoint IP 450 phone is configured to work with Microsoft Live Communications Server 2005, the behavior of the presence setting and buddy lists is different. For more information, contact your system administrator.
Changing Presence Settings

To view and change your presence settings:

1. Do one of the following:
   - Press Menu.
     Select Features > Presence > My Status.
   - Press the MyStat soft key.

2. Scroll through the list, and then press the Select soft key to select your new status.

   The phones watching your status will now display your new status.
   Presence information will also be sent to watching phones when you go off-hook or enable Do Not Disturb.

Managing Buddies

To add or delete a contact from your buddy list:

1. Press Menu.
2. Select Features > Contact Directory.
3. Scroll to highlight the contact.
   You can also use the * key to page up and the # key to page down.
4. Press the Edit soft key.
5. Scroll to the Watch Buddy field.
6. Scroll to select Enabled.
   When Watch Buddy is enabled, the contact is added to your buddy list.
   When Watch Buddy is disabled, the contact is removed from your buddy list.
   The default for Watch Buddy is Disabled.

7. Press the Save soft key.

8. Press ☐ to return to the idle screen.

To block or unblock a contact from your buddy list:

1. Press ☐.

2. Select Features > Contact Directory.

3. Scroll to highlight the contact.
   You can also use the * key to page up and the # key to page down.

4. Press the Edit soft key.

5. Scroll down to the Block Buddy field.

6. Scroll to select Enabled.
   When Block Buddy is enabled, the contact cannot watch your phone.
   When Block Buddy is disabled, the contact can watch your phone.
   The default for Block Buddy is Disabled.

7. Press the Save soft key.

8. Press ☐ to return to the idle screen.

Integrating With Microsoft Live Communications Server 2005

Your system administrator can configure your phone to work with Microsoft Live Communications Server 2005 and communicate with others using Microsoft Office Communicator and Windows Messenger. From your phone, you can invite, join, control, and monitor integrated multipoint audio and video conferences.

Any contact you add through your buddy list will appear as a contact in Microsoft Office Communicator and Windows Messenger. Any contact you add as a contact in Microsoft Office Communicator and Windows Messenger will appear in your buddy list.

To view and change your presence, refer to Changing Presence Settings on page 4-5.

For more information, contact your system administrator.
To add a contact to your buddy list:

1. Press the Menu soft key.
2. Select Features > Presence > Buddy Status.
3. Press the More soft key.
4. Press the Add soft key.
5. Enter the number of the contact.
6. Press the Submit soft key.
7. Press the Menu soft key to return to the idle screen.

To view and change your privacy list:

1. Press the Menu soft key.
2. Select Features > Presence > Buddy Status > Privacy List.
3. Scroll through the list to find the contact.
4. Press the Edit soft key.
5. Scroll down to the Access field.
6. Scroll to enable or disable the Access field.
   When Access is enabled, you allow the contact to see your presence. When Access is disabled, you prevent the contact from seeing your presence.
   The default for Access is Disabled.
7. Press the Menu soft key to return to the idle screen.

For more information on contacting buddies, refer to Placing Calls on page 3-2 or the Microsoft Office Communicator and Windows Messenger documentation.

**Restarting Your Phone**

Periodically, you may need to restart your phone so your phone can accept a new configuration.

**Note** If your phone malfunctions, you may be able to restore normal operation without restarting it. Before you restart your phone, contact your system administrator.
To restart the phone:

1. Press `Menu`.

2. Select Settings > Basic > Restart Phone.
   “Are you sure?” appears on the screen.

3. If you still want to restart your phone, press the Yes soft key.
   The restart process begins. The process ends when the idle screen appears.

**Note** Call lists are automatically cleared when you restart the phone.
This chapter contains general troubleshooting information to help you solve any problems you might encounter when you use your SoundPoint IP 450 phone. The tables in this chapter list possible trouble symptoms, the likely causes of these problems, and the recommended corrective actions to take.

- Power and Startup
- Controls
- Access to Screens and Systems
- Calling
- Displays
- Audio

To obtain more detailed troubleshooting information, you can access certain menus on your phone that test your phone hardware. For more information, see Testing Phone Hardware on page 5-8.

If you require additional assistance, contact your system administrator.
## Power and Startup

<table>
<thead>
<tr>

Testing Phone Hardware

Your system administrator may ask you to access a diagnostics menu on your phone to test your phone hardware. From the diagnostics menu, you can test your phone’s microphones, speaker, handset, third-party headset (if present), keypad mappings, and LCD display. See your system administrator for instructions on how to perform these tests.

To test your phone hardware:

>> Press Menu, and then select Status > Diagnostics > Test Hardware > Audio Diagnostics, Keypad Diagnostics, or Display Diagnostics.
### Service Agreements

Please contact your Polycom Authorized Reseller for information about service agreements applicable to your product.

### Governing Law

This Limited Warranty and Limitation of Liability shall be governed by the laws of the State of California, U.S.A., and by the laws of the United States, excluding their conflicts of laws principles. The United Nations Convention on Contracts for the International Sale of Goods is hereby excluded in its entirety from application to this Limited Warranty and Limitation of Liability.

All rights reserved under International and Pan-American Copyright Conventions. No part of the contents of this manual may be copied, reproduced, or transmitted in any form or by any means, or translated into another language or format, in whole or part, without written consent from Polycom, Inc. Do not remove (or allow anybody else to remove) any product identification, copyright or other notices.

### Limitations of Liability

LIMITATION OF LIABILITY. TO THE FULL EXTENT ALLOWED BY LAW, POLYCOM EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF ITS PRODUCTS, EVEN IF POLYCOM OR ITS AUTHORIZED RESELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT POLYCOM’S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.
## Polycom Limited Warranty and Limitation Liability

**LIMITED WARRANTY.** Polycom warrants to the end user ("Customer") that this product is expected to be free from defects in workmanship and materials, under normal use and service, for one year from the date of purchase from Polycom or its authorized reseller.

Polycom’s sole obligation under this express warranty is at Polycom’s option and expense, to repair the defective product or part, deliver to Customer an equivalent product or part to replace the defective item, or if neither of the two foregoing options are reasonably available, Polycom may, on its sole discretion, refund to Customer the purchase price paid for the defective product. All products that are replaced will become the property of Polycom. Replacement products or parts may be new or reconditioned.

Polycom is expected to warrant any replaced or repaired product or part for ninety (90) days from shipment, or the remainder of the initial warranty period, whichever is longer. Products returned to Polycom must be sent prepaid and packaged appropriately for safe shipment, and it is recommended that they be insured or sent by a method that provides for tracking of the package. Responsibility for loss or damage does not transfer to Polycom until the returned item is received by Polycom. The repaired or replaced item will be shipped to Customer, at Polycom’s expense, not later than thirty (30) days after Polycom receives the defective product, and Polycom will retain risk of loss or damage until the item is delivered to Customer.

The product software comes with 90-day software warranty, providing for software updates (minor releases/bug fixes). To continue to receive support, purchasing a maintenance contract is the most economical solution.

### Exclusions

Polycom will not be liable under this limited warranty if its testing and examination disclose that the alleged defect or malfunction in the product does not exist or results from:

- Failure to follow Polycom’s installation, operation, or maintenance instructions.
- Unauthorized product modification or alteration.
- Unauthorized use of common carrier communication services accessed through the product.
- Abuse, misuse, negligent acts or omissions of Customer and persons under Customer’s control; or
- Acts of third parties, acts of God, accident, fire, lightening, power surges or outages, or other hazards.

### Warranty Exclusive

IF A POLYCOM PRODUCT DOES NOT OPERATE AS WARRANTED ABOVE, CUSTOMER’S SOLE REMEDY FOR BREACH OF THAT WARRANTY SHALL BE REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT POLYCOM’S OPTION. TO THE FULL EXTENT ALLOWED BY LAW, THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND ARE IN LIEU OF ALL OTHER WARRANTIES, TERMS, OR CONDITIONS, EXPRESS OR IMPLIED, EITHER IN FACT OR BY OPERATION OF LAW, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES, TERMS, OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, SATISFACTORY QUALITY, CORRESPONDENCE WITH DESCRIPTION, AND NON-INFRINGEMENT, ALL OF WHICH ARE EXPRESSLY DISCLAIMED. POLYCOM NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE OR USE OF ITS PRODUCTS.
Safety and Compliance

Part 15 FCC Rules
This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interferences received, including interference that may cause undesired operation.

Class B Digital Device or Peripheral
Note: This equipment is tested and complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Modifications
In accordance with Part 15 of the FCC Rules, the user is cautioned that any changes or modifications not expressly approved by Polycom, Inc. could void the user’s authority to operate the equipment. This equipment may not be used on a coin service or party line.

Installation Instructions
Installation must be performed in accordance with all relevant national wiring rules.

L'Installation doit être exécutée conformément à tous les règlements nationaux applicable au filage électrique.

When using PoE (Power over Ethernet), the equipment is to be connected only to PoE networks without connections to the outside plant.

Plugs Acts as Disconnect Device
The socket outlet to which this apparatus is connected must be installed near the equipment and must always be readily accessible.

La prise électrique à laquelle l’appareil est branché doit être installée près de l’équipement et doit toujours être facilement accessible.

Industry Canada (IC)
This Class [B] digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.
### CE and VCCI Mark

This SoundPoint IP 450 SIP is marked with the CE mark. This mark indicates compliance with EC Directives 2006/95/EC and 2004/108/EC. A full copy of the Declaration of Conformity can be obtained from Polycom Ltd., 270 Bath Road, Slough, Berkshire, SL1 4DX, UK.

---

**Warning Electrical Safety**

This product is rated 24Vdc, 0.5A. When used with the optional external power supply, the power supply shall be a Listed power supply with a LPS output, rated 24V, min. 500mA.
Polycom SoundPoint IP450 VoIP Telephone PTC 220/08/077

Special Conditions for the User Manual

PTC General Warning
1. The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

The Use of IP Networks through the PSTN
2. Internet Protocol (IP) by its nature introduces delay into speech signals as each data packet is formulated and addressed. Telecom Access Standards recommends that suppliers, designers and installers using this technology for calls to or from the PSTN refer to ITU E Model requirements in the design of their networks. The overall aim is to minimise delay, distortion and other transmission impairments, particularly for those calls involving cellular and international networks, which already suffer extensive delay.

The Use of Voice Compression through the PSTN
3. Because of the extensive delay already experienced when calling cellular and international networks, some of which is already caused by their use of voice compression technologies. Telecom Access Standards will only approve G711 voice technology for use on the PSTN. G711 is an 'Instantaneous Speech encoding Technique' whereas G729 and all its variants are considered 'Near Instantaneous' introducing additional delay into the speech signal.

Echo cancellation
4. Echo cancellers are not normally required in the Telecom PSTN because geographic delays are acceptable where CPE return loss is maintained within Telepermit limits. However, those private networks making use of Voice over IP technology are required to provide echo cancellation for all voice calls. The combined effect of audio / VoIP conversion delay and IP routing delay can cause the echo cancellation time of 64 mS to be required.

Modification of this Polycom SoundPoint IP450 VoIP Telephone for the New Zealand network
5. All samples of Polycom SoundPoint IP450 VoIP Telephones connected to the Telecom network shall be equipped with the following software Rev .5891. Equipped with this software batch the IP telephone is known to comply with PTC220 speech signal delay requirements. Failure to equip the telephone with this version of software when connected to a Telecom New Zealand network breaks the conditions of this Telepermit.

Australia

WARNING ALL SOUNDPOINT IP PHONES

With respect to section 5.4.3.11 of the Australian Communications Authority as Telecommunications Technical Standard AS/ACIF S004 2006:

You should be aware that, under certain operating conditions, the handset earpiece may retain small metallic objects. If this occurs, these objects should be removed before using the handset.
